Making Sense of Mathematics Teacher Education Fou-Lai Lin, Thomas J. Cooney, 2011-06-28 This is a research based book on mathematics teacher education. It is about the learning of prospective and inservice mathematics teachers, mathematics educators and researchers. The text is intended for a broad audience including teacher educators, mathematics educators, graduate students in mathematics education and mathematics teachers at all levels of schooling. In offering an examination of teacher education programs from different societies and cultures, this book provides an international perspective on mathematics teacher education. Practical situations associated with related theories are studied critically throughout the chapters. The possibilities and constraints of making an analogy between mathematics learning theories and mathematics teachers' learning theories are argued and examined. New perspectives on mathematics teacher education are presented along with relevant examples, thus enhancing the book's readability for international readers.

BACKGROUND OF THE BOOK The book was inspired by the obvious need to address issues in mathematics teacher education. In particular, the following mission statement for the newly established Journal of Mathematics Teacher Education (JMTE) reflects the mission of this book as well: The Journal of Mathematics Teacher Education is devoted to topics and issues involving the education of teachers of mathematics at all stages of their professional development. JMTE will serve as a forum for research on teachers learning for considering institutional, societal and cultural influences that impact the education of mathematics teachers and for creating models for teachers of mathematics. Editorial JMTE 1 1 p

The Principal as Mathematics Leader Ontario Principals' Council, 2009-01-12 Getting down from the ivory tower and stepping out of the principal's office, these authors offer some of the most important and useful books about leadership that principals can buy. Andy Hargreaves, Thomas More Brennan Chair in Education, Boston College, addresses some of the most important challenges facing school leaders today. The authors bring a remarkable combination of deep practical experience and academic sophistication to these challenges. Ken Leithwood, Professor, Ontario Institute for Studies in Education, University of Toronto. This series of little volumes provides a valuable resource for new principals who would become accomplished instructional leaders and seasoned principals looking to strengthen their leadership capacity. Roland S. Barth, Founding Director, Harvard Principals Center. This series allows school principals to integrate theory and practice themselves, resulting in highly insightful and practical strategies that will make a difference in schools. Practitioners lead themselves. Michael Fullan, Professor Emeritus, Ontario Institute for Studies in Education, University of Toronto. Discover the formula for improved mathematics instruction and outcomes. Mathematics teaching and learning have changed so significantly over the past two decades that school leaders may find it difficult to keep up. Part of the Leading Student Achievement series, this book provides solid support for leading mathematics instruction schoolwide. Appropriate for school leaders who would like a stronger foundation in mathematics.

Mathematical Thinking and Problem Solving Alan H. Schoenfeld,Alan H. Sloane,2016-05-06 In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education mathematicians mathematics educators classroom teachers and cognitive scientists Members of these groups came from different traditions had different perspectives and rarely gathered in the same place to discuss issues of common interest Part of the problem was that there was no common ground for the discussions given the disparate traditions and perspectives As one way of addressing this problem the Sloan Foundation funded two conferences in the mid 1980s bringing together members of the different communities in a ground clearing effort designed to establish a base for communication In those conferences interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them A more recent conference upon which this volume is based offered a forum in which various people involved in education reform would present their work and members of the broad communities gathered would comment on it The focus was primarily on college mathematics informed by developments in K 12 mathematics The main issues of the conference were mathematical thinking and problem solving **Guide to Math Materials** Phyllis J.
