

Sample Comparison/Contrast Essay:

The leap from high school to college is a large one. Many students enter post-secondary education expecting the experience to be the same as the one they had while at secondary school. These students are wrong to make this assumption, and they very quickly realize just how different college is. College costs **more**, presents **more** academic challenges, and offers a **more** social environment than high school.

First, in terms of cost, college is **more expensive than** high school because of tuition, living expenses, and books. Anyone who wishes to attend college must pay fees, whereas it is free to attend high school. College tuition can start at roughly \$1,500 per term and can wind up costing as much as \$2,000. The government funds high schools, so high school students do not have to pay for their education. In addition to tuition, college students must also worry about the residence or rental costs for living close to the college's campus. In Toronto, rental costs for a basement apartment can range from \$400 to \$600 per month (not including utilities), and residence fees at most colleges work out to roughly \$2,000 per term. **In contrast**, high school students have no living expenses because the majority of high school students live at home with their parents for free. College is also **more expensive than** high school when it comes to the cost of learning materials, such as textbooks. In college, students must buy textbooks for each course they take. These books are not cheap, and they often wind up costing students several hundreds of dollars once students have purchased the books for all their classes. High school students never have to worry about buying their textbooks because high schools always keep a set of books, which students use and then return at the end of the year. Not only do college students have to pay **more money than** high school students for their education, the college students also have **much more** work to do once their bills have been paid.

Second, the workload in college is **more challenging than** the workload in high school. College students are faced with the task of having to complete an average of three to five assignments per week, **whereas** high school students average only one to three assignments per week. There are **more** assignments in college, and they are also **more** challenging and can take up to eight hours to complete.

in special and inclusive education continues to break new ground with revised and updated strategies based on evidence from the most recent studies in the field. From the myriad of related research available, only those studies with genuine potential for improving the practices of teachers and schools have been included with the aim of facilitating high quality learning and social outcomes for all learners in schools. Updates to this new edition include four new chapters on response to intervention, universal design for learning, inter-agency cooperation, and one on the Finnish education system, over 350 new references, an even wider international focus including evidence drawn from Asia, references to recent developments in neuroscience, a new companion website with extra case studies, links to further reading, journal articles and videos, and an interactive quiz at www.routledge.com/cw/mitchell. This book will be essential reading for anyone with a vocational or academic interest in evidence-based special educational needs teaching strategies, whether a student in initial teacher education or a qualified classroom teacher, teacher educator, educational psychologist, special needs coordinator, parent consultant, or researcher. David Mitchell is an Adjunct Professor in the College of Education, University of Canterbury, Christchurch, New Zealand, and a consultant in inclusive education. This is the book I wish I had written, synthesizing an enormous literature focused on special needs students. It is robust, it is readable, and it is your right hand resource. A stunner of a book. Professor John Hattie, University of Melbourne, author of *Visible Learning*. **Words, Words, Words** Janet Allen, 2023-10-10. Do you spend hours creating word lists and weekly vocabulary tests only to find that your students have forgotten the words by the following week? Janet Allen and her students were frustrated with the same problem. *Words Words Words: Teaching Vocabulary in Grades 4-12* describes the research that changed the way she and many other teachers teach vocabulary. It offers educators practical, research-based solutions for helping students fall into new language, learn new words, and begin to use those words in their speaking and writing lives. This book offers teachers detailed strategy lessons in the following areas: Activating and building background word knowledge; Making word learning meaningful and lasting; Building concept knowledge; Using word and structural analysis to create meaning; Using context as a text support; Making reading the heart of vocabulary instruction. *Words Words Words* provides educators with a strong research base, detailed classroom-based lessons, and graphic organizers to support the strategy lessons. At a time when teachers are struggling to meet content standards in reading across the curriculum, this book offers some practical solutions for meeting those standards in ways that are meaningful and lasting. Exploring Technology for Writing and Writing Instruction Pytash, Kristine E., 2013-07-31. As digital technologies continue to develop and evolve, an understanding of what it means to be technologically literate must also be redefined. Students regularly make use of digital technologies to construct written text both in and out of the classroom, and for modern writing instruction to be successful, educators must adapt to meet this new dichotomy. *Exploring Technology for Writing and Writing Instruction* examines the use of writing technologies in early childhood, elementary, secondary, and post-secondary classrooms, as well as in professional development contexts. This book provides researchers, scholars, students,

educators and professionals around the world with access to the latest knowledge on writing technology and methods for its use in the classroom
