# Albert Einstein

Albert Einstein was one of the greatest scientists of all time. He was born on March 14, 1879, in Germany. From a young age, Einstein was very curious and enjoyed learning about mathematics and science. He made many important discoveries, but he is most famous for his theory of relativity and the equation  $E=mc^2$ , which explains how energy and mass are related.

Einstein won the Nobel Prize in Physics in 1921 for his work on the photoelectric effect. This discovery helped scientists understand how light behaves. Despite his great intelligence, Einstein was humble and believed in using science to make the world a better place.

Einstein moved to the United States in 1933 and worked at Princeton University. He also supported peace and equality during difficult times in history.

His work continues to inspire scientists and learners all over the world. Einstein passed away on April 18, 1955, but his ideas and discoveries will always be remembered.

**Einstein's Pathway to the Special Theory of Relativity** Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein
