WEEK
14**Cause and Effect**

Students practice identifying cause-and-effect relationships by looking for what happens (the effect) and why it happens (the cause).

Evaluate Evidence

Students practice evaluating evidence by identifying the author's main idea and examining the evidence the author uses to support that idea.

DAY
1

Review the Cause and Effect skill with students. Say: An effect is something that happens. The cause is why the effect happened. Some causes can have multiple effects, and some effects come from multiple causes. Tell students they will read about what causes smells and how they affect people differently. Then remind students of the Determine Important Information strategy (Skill 1). Say: As you read, look for the important information that helps you understand the cause-and-effect relationships. Then have students read the instructions at the top of the page and the passage. When students have finished reading, direct them to complete the skill and strategy practice activities. Review the answers together.

WEEK 14
DAY 1

READ THE PASSAGE: Look for causes and effects that explain our ability to smell things.

Get a Whiff of This

A fresh nose, a puddle of gasoline, or a trash bin of rotting garbage—you know it when you smell it! But where do smells come from? Odors are chemicals found in tiny molecules that float in the air. Anything with a smell, whether it is dirty toothpaste or a moldy bathmat, sends off a mixture of these tiny molecules. When they reach your nose, you inhale and some of the chemicals reach nerve cells in your nasal cavity. Nerves send the message to your brain: “Something smells in here!”

For some reason, some people are very sensitive to specific smells, and others can hardly smell anything at all. Researchers have discovered that our ability to detect odors is passed on from parents to their children. Every person recognizes smells differently.

Strong smells linger because the chemicals do not change easily. One of the most pungent smells known is that of a skunk's spray. Getting rid of the smell on a person or dog that has been sprayed can be quite difficult. Some traditional methods, such as bathing in tomato juice, only mask the odor. Other mixtures, such as a mixture of hydrogen peroxide and baking soda, work better because they actually change the chemical composition of the odor molecules. But they can't neutralize the smell completely. Wetness can bring out a smell that you thought you had gotten rid of. So, a dog might smell OK when he's fur has dried after a bath, but when it starts to rain, you might need to hold your nose again!

SKILL PRACTICE: Read each question. Fill in the bubble next to the correct answer.

1. What causes smells?
 - ☐ (A) patterns of odor recognition
 - ☐ (B) mixtures of foods
 - ☐ (C) chemicals in the air
 - ☐ (D) nerves in the nasal cavity

2. Why is tomato juice not effective in getting rid of the smell of skunk spray on a dog?
 - ☐ (A) It only neutralizes the smell temporarily.
 - ☐ (B) It only changes the color of the dog's fur.
 - ☐ (C) It only makes the smell worse.
 - ☐ (D) It only hides the smell.
