

# FUNCTIONAL COMMUNICATION PROFILE-R

## Functional Communication

The *Functional Communication Profile-Revised (FCP-R)* is an overall inventory of an individual's communication abilities, mode of communication (i.e., verbal, sign, nonverbal, augmentative), and degree of independence. This tool is not a standardized assessment protocol, meaning it does not compare a child's skills to that of his/her age matched peers.

Individuals are observed and rated in the following areas:

- **Sensory:** Evaluates sound localization, visual ability, and eye contact
- **Motor:** Evaluates gross-motor skills, fine-motor skills, and self-help skills
- **Behavior:** Evaluates appropriateness of behaviors in response to environmental stimuli
- **Attentiveness:** Evaluates attention span, alertness, response levels, cooperation, and level of awareness
- **Receptive Language:** Evaluates comprehension of basic concepts, ability to follow directions, responsiveness to name, and ability to point to items or pictures when named
- **Expressive Language:** Evaluates verbal and nonverbal communication, vocabulary, grammar, and phrase length, and ability to express thoughts and ideas
- **Pragmatic/Social Language:** Evaluates ability to show communicative intent, to ask and answer questions, maintain a conversation, participate in turn-taking, initiate topics, and elaborate on details for listener

*A Coursebook on Aphasia and Other Neurogenic Language Disorders, Fifth Edition* M.N. Hegde,2022-10-31 A Coursebook on Aphasia and Other Neurogenic Language Disorders Fifth Edition is a textbook for courses in aphasia and other neurogenic communication disorders It is organized in a unique and interactive coursebook format that divides pages into columns with written information next to columns with space for note taking This allows instructors to make lecture notes and students to write class notes on the right half of each page of the text The Coursebook offers a comprehensive description and critical review of basic and applied research on aphasia right hemisphere disorder RHD traumatic brain injury TBI and dementia the four major language and communication disorders associated with neurological pathologies The relationship between the brain and language major features of aphasia and other disorders their assessment and treatment have been described in streamlined and clinician friendly language Critical review of theories assessment and treatment research helps speech language pathologists distinguish valid from the questionable in the professional and scientific literature All assessment and treatment chapters give an outline of comprehensive and practical procedures integrating current practices that clinicians might readily use New to the Fifth Edition Part I has been restructured under the heading Brain and Language to describe the neuroanatomical bases of language and language impairments associated with neuropathological variables The chapter on neurodiagnostics has been updated to include a variety of surgical radiological and imaging procedures that help students understand the relationship between the brain structure and function and their involvement in language production and comprehension Part II has been reorganized into three chapters on aphasia Chapter 3 offers a comprehensive review of aphasia prevalence definition and classification Newer perspectives on intraoperative cortical brain mapping and alternative classification of aphasia based on recent research on the dual stream hypotheses related to brain and language have been reviewed with critical evaluation to help clinicians Chapters 4 and 5 on assessment and treatment of aphasia offer a more comprehensive review of established and newer procedures The chapter on treatment is expanded to include telerehab drug treatment brain stimulation and technologically based interventions All major language intervention techniques are reviewed with outlined recommendations for clinicians Part III on RHD consists of two

revised chapters reflecting current terminology research and clinical practice issues Sections on neglect deficit awareness social communication and abstract language intervention have been updated Part IV offers the most recent research on TBI rehabilitation Research on teaching compensatory strategies group therapy and community reentry has been updated with clinical recommendations Part V s two chapters on dementia include new information on changing incidence and prevalence patterns of dementia infectious and rapidly progressive dementias frontotemporal dementias primary progressive aphasia and HIV associated neurocognitive disorders

Communication Disability and the Psychiatry of Old Age Karen Bryan, Jane Maxim, 2010-09-07 This book discusses management of communication disorders in the psychiatry of old age The contribution of the speech and language therapist is the focus of the book but this is described within the context of the multidisciplinary team Language change and language assessment in psychiatric disorders associated with old age especially dementias are described in detail The form of service delivery offered is fundamental to the speech and language therapy intervention that can be offered to this complex and often neglected client group A management perspective and service delivery in the USA and in the UK are described Working with carers service delivery in the community an innovative scheme involving residential homes a review of how community care initiatives have affected speech and language therapy services and an analysis of service audit are all included As well as giving a description of speech and language therapy intervention with the elderly who have psychiatric disorders the book also highlights the issues and challenges facing clinicians who work within the reformed health service It should be of considerable interest to speech and language therapists other health care professionals and students who work with older mentally ill people Purchasers and managers who are commissioning and providing services for the older population with psychiatric disorders should also find the book useful

*Essentials of Assessing Infants, Toddlers, and Preschoolers* Brittany A. Dale, Joseph R. Engler, Vincent C. Alfonso, 2025-03-05 A practitioner oriented guide to the most important assessments and evaluation techniques for children ages 0 5 Many assessment professionals leave their graduate education programs without any formal training in assessing infants and young children Although there are assessment textbooks covering subsets of this age range *Essentials of Assessing Infants Toddlers and Pre Schoolers* is uniquely designed for busy practitioners and it covers the full range of assessments for 0 5 years old With medical advances and new treatments there is a higher prevalence of children with complex medical and psychological needs Additionally changing educational policies often affect assessment practices Assessment professionals must have current information to effectively assess young children and assist in planning interventions As with all volumes in the *Essentials of Psychological Assessment* series this book consists of concise chapters featuring callout boxes highlighting key concepts easy to learn bullet points and extensive illustrative material as well as test questions that help you gauge and reinforce your grasp of the information covered Understand the issues unique to assessing children aged 0 5 years Get expert advice on assessing children with extremely early preterm birth genetic conditions and other unique situations Consider the future

directions in the assessment of infants toddlers and preschoolers Quickly and easily locate pertinent information and access resources and tools to aid in performing professional duties This straightforward manual includes thorough coverage on how assessment results guide effective interventions Essentials of Assessing Infants Toddlers and Pre Schoolers is a valuable addition to the libraries of developmental practitioners school and clinical psychologists pediatricians speech language pathologists and others responsible for the assessment of very young children *Dictionary of Communication Disorders* David Morris, 2013-01-16 This dictionary provides clear and concise explanations of terms used in the field of speech therapy pathology and relevant terms in related fields including augmentative alternative communication hearing linguistic medicine phonetics phonology and psychology psychiatry Those working with people who have communication disorders and those who may be returning to this field will find the explanations easy to understand Terms include assessments therapy programmes and current theories in these fields This edition has been thoroughly updated It includes useful website addresses for manufacturers and suppliers of communication aids and publishers of assessments and where to find useful information on the internet for various conditions **Cognitive Retraining Using Microcomputers** Veronica A. Bradley, John L. Welch, Clive E. Skilbeck, 2018-10-03 Originally published in 1993 the previous decade had seen considerable development in the field of neuropsychological rehabilitation following brain damage and the use of computerized methods attracted attention and stimulated controversy This practically oriented text reviews representative examples from the literature at the time relating to the training of cognitive systems with the emphasis on studies describing the use of computerized methods The topic is discussed in context and the contents include sections on cognitive change in neurological disorders assessment techniques the interaction between cognition and behaviour and the advantages and disadvantages of the use of microcomputers The authors describe the evaluation of a computerized cognitive retraining programme run at the Regional Neurological Centre in Newcastle upon Tyne and draw on their experience of running such programmes to give practical guidance to those wishing to set up cognitive retraining programmes
