Tourism Senay Sabah, 2019-11-06 Tourism is an important phenomenon of today's global world and is regarded as the world's biggest industry. As a concept, tourism inspires attention from different scientific areas and can be considered within an interdisciplinary context. Due to its multidisciplinary, multidimensional, and multimethod character, tourism is an area ripe for study. This book is a modest try for that end. The chapters are written from economic, managerial, marketing, and educational perspectives using different frameworks and methodologies.

Traditions and Transformations of Habitation in Indonesia Bagoes Wiryomartono, 2020-03-04 This book raises the issue of the practice of patrimonial power with a focus on habitations, particularly in the urban areas of Indonesia. An assemblage of interdisciplinary studies within the framework of environmental humanities covering the arts, architecture, urban studies, geography, cultural anthropology, and sociology, this multifaceted framework divulges the interactive connectivity between Indonesia's patrimonial culture and the socio-culturally constructed system of habitation. The interdisciplinary study of the pertinent practices of patrimonial power that have been represented and been manifested by various political and traditional regimes in terms of the built environment and habitation in Indonesia contributes to a new understanding of Indonesian urban spatial development from the pre-colonial era to the present. The book poses that in order to understand the politics of Indonesia, one must understand the culture and tradition of the political leadership of the country. The author presents such an understanding in exploring and unpacking the relationship between people and place that constructs, develops, sustains, and conserves Indonesian culture and traditions of habitation. This book is of interest to graduate scholars and researchers in Asian Studies in numerous disciplines including urban studies, urban planning, and design, political science, architecture, anthropology of space, public administration, and political philosophy.

Tourism and Politics Peter M. Burns, Marina Novelli, 2007-03-14 Tourism and Politics aims to disseminate ideas on the critical discourse of tourism and tourists as they relate to politics through a series of case studies from around the world, written by specialists with an emphasis on linking theory to practice. That tourism is a profoundly important economic sector for most countries and regions of the world is widely accepted, even if some of the detail remains controversial. However, as tourism matures as a subject, the theories underpinning it necessarily need to be more sophisticated. Tourism cannot be simply read as a business proposition with a series of impacts. Wider questions of politics, power, and identity need to be articulated, investigated, and answered. While the making and consuming of tourism takes place within complex political milieux with multiple stakeholders competing for

benefit the implications are not fully understood Literature on tourism and politics is surprisingly limited This book will make a substantial contribution to the theoretical framework of tourism

The Romance of K'tut Tantri and Indonesia Timothy Lindsey, 2008 This historiographic study of K tut Tantri alias Vannen Walker the journalist from the Isle of Man Muriel Pearson the unhappy wife and Surabaya Sue the notorious revolutionary compares her romantic and colorful autobiography *Revolt in Paradise* with other versions of her past including those of her fellow Bali colonists and her revolutionary comrades as well as her foes the Dutch and various intelligence organizations These alternative accounts of her past question the image of K tut Tantri as hero portraying her instead as dishonest unstable egotistical and immoral Such criticisms have overshadowed proper recognition of her role in the development of modern Indonesia both as a bohemian hotelier in between wars Bali and later as propaganda broadcaster and adviser to Indonesian revolutionary leaders including Soekarno Sutomo and Syarifuddin Focusing on the nature of biography and autobiography this book analyses K tut Tantri's self defeating battle to use history in text and film script to define her identity and reappropriate her past An examination of the use of ideas of truth and fiction in understanding the past leads to broader consideration of the nature of history and its uses Finally an attempt is made to reconcile the deconstruction of K tut Tantri's autobiography with both an acceptance of the validity of alternative historical genres and an acceptance of the problems inherent in writing a history of a living person

International Seminar on Urban Culture Arte-Polis, 2006 **ICRDB Cancergram**, 1985 **Contemporary Bali** Agung Wardana, 2019-01-25 This book offers a comprehensive examination of spatial and environmental governance in contemporary Bali In the era of decentralisation Bali's eight district governments and one municipality acquired a strong sense of authority to extract

revenues from within their territorial borders while disregarding the impacts beyond them which has exacerbated environmental cultural and institutional issues These issues are addressed through reorganising space In reality however such re organisation has predominantly been in order to provide space for tourism investments and market expansion The outcomes of reorganising space are in fact shaped by the dynamics of power that interface with increasingly complex legal and institutional structures These complex structures provide more arenas for vested interests to manoeuvre but at the same time provide different forms of legitimacy for local forces to challenge the dominant process The book demonstrates the mechanisms through which social actors mobilise legal institutional arrangements to advance their interests
