The Americans ,2003 **The Americans: Reconstruction Through the 20th Century** Holt McDougal,2002

American Record Guide ,2002 Philosophy, History and Social Action S. Hook,W. O'Neill,R. O'Toole,2012-12-06 Two articles by Lewis Feuer caught my attention in the 40s when I was wondering as a student physicist about the relations of physics to philosophy and to the world in turmoil One was his essay on The Development of Logical Empiricism 1941 and the other his critical review of Philipp Frank's biography of Einstein Philosophy and the Theory of Relativity 1947 How extraordinary it was to find so intelligent independent critical and humane a mind and furthermore he went further as I soon realized when I looked for his name on other publications I recall arguing with myself over his exploration of Indeterminacy and Economic Development 1948 and even more when I read his Dialectical Materialism and Soviet Science 1949 More papers and then the fascinating sometimes irritating always insightful books His monograph on Psychoanalysis and Ethics 1955 the beautiful sociological and humanist study of Spinoza and the Rise of Liberalism 1958 his essays on The Social Roots of Einstein's Theory of Relativity 1971 together with the book on Einstein and the Generations of Science 1974 the splendid reader from the works of Marx and Engels Basic Writings on Politics and Philosophy 1959 which was a major text of the 60s the stimulating essays on the social formation which seems to have been required for a modern scientific movement to develop set forth most convincingly in The Scientific Intellectual 1963 **The Future of the Past** Georgios K. Giannakis,Theodore Papangelis,Antonios Rengakos,2024-10-07 This collective volume contains 27 original studies that address in a critical way the position of classical studies in the twenty first century and its challenges as captured in the oxymoron of the theme title the future of the past The relevance of classical antiquity is reflected in all aspects of modern life the sciences the linguistic forms literary expressions cultural tradition religion and ethics philosophical thinking modes of argument political theory history the arts and an entire host of other areas in a word much of what modern man is As the conversation between past and present is best demonstrated at the intersection of different disciplines and cultural trends interdisciplinary and intercultural topics are discussed in the essays The contributions are organized in thematic groups according to the topics and sub topics covered and explore new ways of viewing the values of the classical past and their relevance to the present and future of societies The work is of special relevance to scholars interested in classical studies ancient history critical thinking the reception of classical ideas in the modern world and the relation of the past with the present and the future of humanity *A Theologian's Guide to Heidegger* Hue Woodson,2019-08-30 A Theologian's Guide to Heidegger provides a uniquely theological introduction to the philosophy of Martin Heidegger by focusing on not just the relationship between Heidegger and theology or even the nature of the discourse that must occur between theological concerns and Heidegger's philosophical errands but by precisely exploring how theology can use Heidegger's philosophy as a means of outlining the scope and task of postmodern theology To do this especially with the postmodern theologian in mind

this book considers the general relationship between Heidegger and theology how Heidegger can be read theologically while justifying why Heidegger must be read this way and defining the role that Heidegger must take in postmodern theology This includes a careful consideration of Heidegger's early theological roots from Freiburg to Marburg by examining the content of Heidegger's lesser known theologically minded seminars lectures and talks

States, Actors and Geopolitical Drivers in the Mediterranean Francesca Maria Corrao, Riccardo Redaelli, 2021-09-20 Moving from a historical and cultural perspective this book examines the geo political and socio economic changes involving the enlarged Mediterranean Organised into two main sections the first section The new centrality of the Mediterranean Basin Trends and Dynamics is devoted to the analysis of the most relevant drivers and interdisciplinary broader issues and the second section Hotspots of Crisis and Regional Interferences in the Mediterranean assesses the situation in some areas interested by the waves of uprisings since 2011 12 The book aims to uncover this new critical centrality of the Mediterranean in the global scenario through the analysis of the interactions and intertwining of those trends and dynamics offering a historical holistic broad view What follows is an Italian perspective that is the result of the research of a group of scholars who have been working for years on the first hand sources of the countries examined A peculiar vision connected not only to its unique geographical position at the center of the basin but also to its deep relations with the southern shore throughout its long history

Public Relations and Neoliberalism Kristin Demetrious, 2022 Focusing on two of the most fraught and intractable public debates of the present time human induced climate change and the human rights of refugees asylum seekers immigrants and the stateless this book raises critical questions about the role and relationship of public relations in weakening democratic political systems It shows a clear but often indirect link between PR and a neoliberal agenda that has been vastly underestimated and oversimplified as spin This comes at a great cost for society Public Relations and Neoliberalism provides a panoramic view of public relations from the post war period when a powerful communication template propelled by the PR industry served the neoliberal agenda to create political diversion division and hegemony at the same time But today public relations is not just a tool of industry or government Rather it has become the default mode and style of being and relating in the world that seeps into and affects all areas of life professional corporate domestic political activist and technological And the metastasis of neoliberal meaning into so many realms has important ramifications for society and individuals Looking at the confluences and contradictions within the logic of public relations both as a practice and in terms of how it has been theorized and understood this book provides an important contribution to critical work in the communicative field

Studying Organizations Using Critical Realism Paul K.
