

EVIDENCES OF EVOLUTION LAB

I. PURPOSE: What are the 6 Evidences of Evolution?

BACKGROUND: Evidence has been found to indicate that living things have changed gradually during their natural history. The studies of fossils as well as embryology, biochemistry, anatomy, geographic distribution and current observations of natural selection provide evidence for evolution.

II. MATERIALS: Copy of Figure 1, copy of Table 1, copy of Table 2, copy of Table 3

III. PROCEDURES:

Attach Figure 1, Table 1 and Table 2 in your Data and Observations section. Then read through each section of the INSTRUCTIONS and complete tables or answer questions as instructed. Record table information in the DATA and OBSERVATIONS section of your lab. After answering questions 1-19, complete Table 3 and attach in the Questions section before completing the Discussion and Conclusion.

INSTRUCTIONS:

SECTION 1 : EVIDENCE FROM COMPARATIVE ANATOMY

By comparing anatomical structures, evolutionary links can be established between groups of organisms. These comparisons include examining Homologous Structures, Analogous Structures and Vestigial Structures.

a. HOMOLOGOUS STRUCTURES

The structures in FIGURE 1 are *formed* in similar ways during embryonic development and share like arrangements: however, they have somewhat different forms and functions. They are called homologous structures.

1. Carefully examine the drawings of the bones in FIGURE 1. Look for *similarities* among among the various animals. **COLOR** each part of the human arm a different color. Color all the bones of the wrist another color and the bones of the phalanges (fingers) yet another color. Then **color** the corresponding bone in each of the other animals the same color as those in the human bone. Attach FIGURE 1 in your Data and Observations Section
2. In Table 1, describe the function of the phalanges (fingers) of each set of bones.
3. Answer questions 1 and 2.

b. ANALOGOUS STRUCTURES

Some apparently unrelated animals have organs with similar function, yet are very different in structure and form. These structures are called analogous structures.

1. Examine FIGURE 2 of the moth wing and the bat wing. Answer questions 3-5.

Lab Evidence For Evolution:

Evidence for God William A. Dembski, Michael R. Licona, 2010-07-01 There have always been challenges to belief in God as he is revealed in the Bible and each new year seems to add more questions to the doubter's arsenal In *Evidence for God* leading apologists provide compelling arguments that address the most pressing questions of the day about God science Jesus the Bible and more including Is Intelligent Design really a credible explanation of the origins of our world Did Jesus really exist Is Jesus really the only way to God What about those who have never heard the gospel Is the Bible today what was originally written What about recently publicized gospels that aren't in the Bible and much more **Increasing Student**

Comprehension of Evolution Through Laboratory Investigations and Simulations Steven W. McClintock, 2008 The Molecular Life of Diatoms Angela Falciatore, Thomas Mock, 2022-05-11 Diatoms are the most species rich group of algae and they contribute about 20% of annual global carbon fixation They play major roles in ocean food webs and global biogeochemical cycles They are also a target of the biotechnology industry because of their nano patterned silica cell wall and high lipid content Diatoms have received increasing attention as more genomes became available and because of the development of genome editing tools such as the CRISPR Cas9 technology which has made diatoms as genetically tractable as well established biological model species This book provides an overview on diatom molecular biology It brings together international leading experts in the field to discuss the latest data and developments from genes to ecosystems As the understanding of diatoms is currently experiencing a step change it is critical to allow for synergistic approaches on diverse aspects of diatom biology and evolution The book offers fundamental insights into the molecular life of diatoms at the same time new scientific concepts are developed based on the application of the latest molecular tools and genomic information to explore the fascinating lifestyle of diatoms **The Foundations of Behavioral Economic Analysis** Sanjit

Dhami, 2019-02-14 Taken from the first definitive introduction to behavioral economics *The Foundations of Behavioral Economic Analysis* Other Regarding Preferences is an authoritative and cutting edge guide to this essential topic for advanced undergraduate and postgraduate students It considers the evidence from experimental games on human sociality and gives models and applications of inequity aversion intention based reciprocity conditional cooperation human virtues and social identity This updated extract from Dhami's leading textbook allows the reader to pursue subsections of this vast and rapidly growing field and to tailor their reading to their specific interests in behavioural economics **Nothing Created**

Everything Ray Comfort, 2009 Richard Dawkins is arguably the modern poster boy for Charles Darwin However a key difference radically separates the two men Darwin believed in the existence of God and calls God the Creator seven times in *The Origin of Species* Dawkins in contrast claims The more you understand the significance of evolution the more you are pushed towards atheism It seems Professor Dawkins thinks Charles Darwin didn't understand his own theory Just months after the 2009 discovery of the supposed missing link author Ray Comfort turns the tables on evolutionists In *Nothing*

Created Everything he examines the evidence for evolution and shows it is lacking He demonstrates that when it comes to explaining how life began atheists and evolutionists offer faith not facts Ironically atheists insist nothing created everything a scientific impossibility In a conversational tone Comfort speaks to both atheists and believers and urges this discussion be based on hard evidence And when it is he insists people will realize evolution is a theory that can't be tested or measured and therefore can't be scientific

The Foundations of Behavioral Economic Analysis Sanjit S. Dhami, 2016 It considers the evidence against the exponential discounted utility model and describes several behavioral models such as hyperbolic discounting attribute based models and the reference time theory Part IV describes the evidence on classical game theory and considers several models of behavioral game theory including level k and cognitive hierarchy models quantal response equilibrium and psychological game theory Part V considers behavioral models of learning that include evolutionary game theory classical models of learning experience weighted attraction model learning direction theory and stochastic social dynamics Part VI studies the role of emotions among other topics it considers projection bias temptation preferences happiness economics and interaction between emotions and cognition Part VII considers bounded rationality The three main topics considered are judgment heuristics and biases mental accounting and behavioral finance *Evolution* ,

Explaining Life Through Evolution Prosanta Chakrabarty, 2022-04-29 The story of four billion years of eight million lives Looking forward to an unputdownable book on that explains life Well here it is Explaining Life Through Evolution opens a window to 4 billion years of 8 million lives that we see in this planet This book does not simply narrate the story of evolution It is more than about where we came from It brings to light who we are As humans we naturally focus more on identifying differences between us no matter how small they are Prosanta demystifies this notion to emphasize our similarities with each other than many of us are willing to believe As more and more people take ancestry tests sending their DNA samples and money to genealogy testing centres we need to be educated on what the results actually mean scientifically and we all have to decide together what it means socially We should be celebrating the fact that this diversity comes from the same little drops of water and sunlight each just shining a little differently Like all species we are defined by our differences as much as by our similarities Prosanta encourages us to think of life as being this book which is always in the making We are just only

seeing the last few pages of each chapter If you look out on the eight million species that we share this planet with think of them all being four billion years of evolution They re all the product of that Think of us all as young leaves on this ancient and gigantic tree of life all of us connected by invisible branches not just to each other but to our extinct relatives and our evolutionary ancestors Evocative comprehensive and argumentative this is a must read and reread a book which will compel you to imagine and reimagine life around us *Coping With Environmental Fluctuations: Ecological and Evolutionary Perspectives* Sylvain Giroud, Julia Nowack, Kenneth B. Storey, Andreas Nord, 2020-12-24 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **Evolution in Perspective** Rodger W. Bybee, 2004 This collection comes from and is developed for educators who deal with the controversy over evolution every day From a practical standpoint the book can help address the subject in the classroom and from a substantive standpoint it provides a remarkable overview of the state of teaching evolution in America *Defending the Faith* Dr. Henry M. Morris, 1999-09-01 When Jude wrote his Epistle he implored believers in all ages to be diligent in their defense of the faith And the faith clearly was and is belief in Jesus Christ as Creator and Redeemer So just as Solomon assured us that there is nothing new under the sun we re not surprised that there are attacks on the gospel today Jude was just as familiar with these enemies of the gospel in his time Now author Henry Morris offers up a brand new look at these age old attacks on the faith tackling a breathtaking range of issues from science and the Bible to liberal criticisms of the Bible A powerful weapon in the battle for truth Defending the Faith doesn t shrink from the fight but rather speaks the truth in love *Annual register* Stanford University, 1912 **Announcement of Courses** Stanford University, 1913

Improving the proof: Evolution of and emerging trends in impact assessment methods and approaches in agricultural development Mywish K. Maredia, Assessing impacts of public investments has long captured the interest and attention of the development community This paper presents the evolution of different methods and approaches used for ex ante appraisal monitoring project evaluation and impact assessment over the last five decades Among these tools impact assessment IA conducted retrospectively comes closest to providing the proof of development effectiveness It is defined as the systematic analysis of the significant or lasting changes in people s lives brought about by a given action or series of actions in relation to a counterfactual There are three basic types of retrospective IAs macro level IAs that focus on the contribution of developmental efforts to an impact goal aggregated at a sector or a system level micro level impact evaluations IEs concerned with estimating the average effect of an intervention on outcomes at the beneficiary level and

micro level ex post impact analysis concerned with total effects of a development effort after the outputs are scaled up Ex post IAs have evolved and expanded over the decades in both breadth and depth of analysis in response to evolving development themes and methodological advancements The increased emphasis on learning from evaluations has also seen responses from both quantitative and qualitative camps of the evaluation community The paper argues that generation of robust knowledge that feeds into making developmental policies and investment decisions requires a hierarchical and cumulative approach to improving the proof through rigorous and a variety of impact assessment methods applied incrementally at the project program and system level Subjecting as many development interventions as resources allow to rigorous impact assessment based on a common framework can help build a critical body of evidence on impacts of development interventions which can then be subjected to meta analyses to help assimilate results across different studies and build a knowledge base on what works and what does not
