challenges to many forms of education The challenges are amplified in contemporary society where people traverse many
different contexts and where contexts themselves are continuously changing Designing for Situated Knowledge
Transformation provides a structured answer to these questions through an investigation of the theoretical empirical
methodological and pedagogical design aspects which they involve Raising profound questions about the nature of
knowledge of situativity and of transfer transformation and resituation it calls for and provides extended empirical studies of
the forms of transformation that knowledge undergoes when people find themselves in new contexts while relying on existing
knowledge Considering many avenues of practical application and insight Designing for Situated Knowledge Transformation

develops a coherent framework for developing learning designs for knowledge transformation that is crucial in today's educational settings
