 In: *Textbook of anatomy and physiology*, 10th ed., pp. 11-15.

How does the structure of skeletal muscle relate to its function?
 Explain the relationship between the structure and function of skeletal muscle.

QUESTIONS

1. How does the structure of skeletal muscle relate to its function?
2. Explain the relationship between the structure and function of skeletal muscle.

A skeletal muscle is composed of many individual muscle fibers, which are arranged in parallel. Each fiber is surrounded by a sarcolemma, which is a thin layer of cytoplasm. The sarcolemma is composed of a phospholipid bilayer, which is a double layer of phospholipids. The sarcolemma is also composed of a network of proteins, which are embedded in the bilayer. The sarcolemma is responsible for the electrical coupling between adjacent muscle fibers, which allows them to contract in a coordinated manner.
