mathematics      **The Online Tutor's Toolkit** Molly Bolding, 2022-10-12 This book contains everything you need to know to get started as an online tutor. It covers the essentials of tutoring: choosing your tech and software, managing homework and getting set up, alongside detailed guidance focusing on each level of tuition. With techniques developed through research and first-hand experience, the author explains exactly how to turn existing subject knowledge into effective tutoring for students of all ages in a variety of subjects. Divided into two parts, the first answers the logistical questions facing every new tutor, such as what equipment do I need? Where can I apply? How much should I charge? The second half focuses on how to tutor different age groups effectively and subject-specific areas including English, Maths, and Science, as well as the author's tried and tested 5-step process for choosing a subject, assessing a student, and planning their first lessons. There is also information on how to support students writing personal statements and applying to university, as well as teaching English as a Second Language. Alongside tailored up-to-date information on available software, hardware, exam specifications, and the online tutoring marketplace, the book contains a 10-week timetable of adaptable lesson plans so new tutors can get started immediately. Finally, there are two additional downloadable chapters which expand on less common subjects and another which includes a digital download of every resource from the book. With suggestions for resources, homework, and timings to support you at every stage, this is an essential read for anyone wanting to succeed as an online tutor.      Principles and Practice of Constraint Programming - CP 2009 Ian P. Gent, 2009-09-19 This volume contains the papers presented at CP 2009, The 15th International Conference on Principles and Practice of Constraint Programming. It was held from September 20-24, 2009, at the Rectory of the New University of Lisbon, Portugal. Everyone involved with the conference thanks our sponsors for their support. There were 128 submissions to the research track, of which 53 were accepted for a rate of 41.4%. Each submission was reviewed by three reviewers, with a small number of additional reviews obtained in exceptional cases. Each review was either by a Programme Committee member or by a colleague invited to help by a committee member, thanks to their particular expertise. Papers submitted as long papers were accepted at full length or not at all. It is important to note that papers submitted as short papers were held to the same high standards of quality as long papers. There is thus no distinction in these proceedings between long and short papers, except of course the number of pages they occupy. As it happens, the acceptance rates of short and long papers were very similar indeed. There were 13 submissions to the application track, of which 8 were accepted for a rate of 61.5%. Papers underwent the same review process as regular papers, and there was not a separate committee for reviewing application track papers. However, papers in the application track were not required to be original or novel research, but to be original and novel as an application of constraints.      *The Yearbook of the Universities of the Empire*, 1914      **(Free Sample) 12 IPMAT Previous Year Solved Papers (2022 - 2017) for IIM Indore, Jammu & Rohtak 2nd Edition | PYQs Question Bank | For Integrated Program in Management Aptitude Test 2023** | Disha Experts, 2023-01-04 The latest and updated 2nd edition of the book 12 IPMAT Solved Papers 2022-2017 for IIM Indore.
