**Reconstruction** Nathan Rose,2022-01-07 Accident reconstruction utilizes principles of physics and empirical data to analyze  
 the physical electronic video audio and testimonial evidence from a crash to determine how and why the crash occurred how  
 the crash could have been avoided or to determine whose description of the crash is most accurate This process draws  
 together aspects of mathematics physics engineering materials science human factors and psychology and combines  
 analytical models with empirical test data Different types of crashes produce different types of evidence and call for different  
 analysis methods Still the basic philosophical approach of the reconstructionist is the same from crash type to crash type as  
 are the physical principles that are brought to bear on the analysis This book covers a basic approach to accident  
 reconstruction including the underlying physical principles that are used then details how this approach and the principles  
 are applied when reconstructing motorcycle crashes This second edition of Motorcycle Accident Reconstruction presents a  
 thorough systematic and scientific overview of the available methods for reconstructing motorcycle crashes This new edition  
 contains Additional theoretical models examples case studies and test data An updated bibliography incorporating the newest
