

Introduction to Microsoft Word 2019

Microsoft Word is a word processing program you can use to write letters, resumes, reports, and more. Anything you can create with a typewriter, you can create with Word. You can make your documents more appealing and easier to read by applying formatting to text.

Getting Started

Double-click the Microsoft Word icon to open the program. If you have used Word 2003 or older, you will notice differences in the layout of the screen. Microsoft has replaced the menu bar and toolbars with the **Ribbon**, which is organized into different tabbed sections at the top, each with their own set of tools. The **Title Bar** is centered. At the bottom right you can **zoom in** and out of your document view. Below is an image of the Microsoft Word screen.

The **Home**, **Insert**, **Design**, **Layout**, **References**, **Mailings**, **Review**, and **View** tabs will allow you to work on your document. The **File** tab will take you to a backstage view where you can save, print, and administer your document—you'll see a different view, but your document is still available when you click back to another tab.
