the strain of earth's population Lane advocates an ecological footprint approach Third a single global market economy and its complexities must be addressed as national economies are increasingly opened Finally as traditional state sovereignty weakens foreign military intervention in both international and intra state conflicts increases Governments are attempting to address these interdependencies or reply to the challenges they pose mainly through international organizations and regionalism These efforts are discussed at length In addition problems with international law are reviewed as Lane warns against the utopian hopes of global constitutionalism Globalization also examines the potential consequences of failing to address the need for coordination in efforts to address shared global challenges **PC-SOLVE III User's Manual** Edward
