

Evidence for Evolution

Part A - Homologous Structures: Evolution is defined as the change in the inherited characteristics of biological populations over successive generations. For each question below, identify whether the evidence is **anatomical** (body) – **homologous structures**, **anatomical** (body) – **analogous structures**, **molecular** (DNA) – **homologous structures**, **molecular** (DNA) – **analogous structures**, or from the **fossil record**. Then, using complete sentences, explain how it serves as evidence for evolution.

Example: Humans and dolphins have the same bones making up their arms and fins.

- a. Identify the evidence for evolution.

Anatomical – Homologous Structures

- b. Explain how this serves as evidence for evolution.

The arm and fin have similar construction, yet perform different functions. This means these are anatomically similar structures inherited from a common ancestor.

1. Scientists discover preserved bones of a large animal that no longer exists today.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

2. The human gene for muscle protein differs from the muscle protein in monkeys in 4 places. It differs from the muscle protein in chickens in 25 places.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

3. Humans, rabbits and whales all have an appendix, an extra piece in their digestive system. In humans, this structure is much smaller and is thought to no longer serve a purpose.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

Evolution 2.0 Perry Marshall, 2015-09-01 In the ongoing debate about evolution science and faith face off But the truth is both sides are right and wrong In one corner Atheists like Richard Dawkins Daniel Dennett and Jerry Coyne They insist evolution happens by blind random accident Their devout adherence to Neo Darwinism omits the latest science glossing over crucial questions and fascinating details In the other corner Intelligent Design advocates like William Dembski Stephen Meyer and Michael Behe Many defy scientific consensus maintaining that evolution is a fraud and rejecting common ancestry outright There is a third way Evolution 2.0 proves that while evolution is not a hoax neither is it random nor accidental Changes are targeted adaptive and aware You ll discover How organisms re engineer their genetic destiny in real time Amazing systems living things use to re design themselves Every cell is armed with machinery for editing its own DNA The five amazing tools organisms use to alter their genetics 70 years of scientific discoveries of which the public has heard virtually nothing Perry Marshall approached evolution with skepticism for religious reasons As an engineer he rejected the concept of organisms randomly evolving But an epiphany that DNA is code much like data in our digital age sparked a 10 year journey of in depth research into more than 70 years of under reported evolutionary science This led to a new understanding of evolution an evolution 2.0 that not only furthers technology and medicine but fuels our sense of wonder at life itself This book will open your eyes and transform your thinking about evolution and God You ll gain a deeper appreciation for our place in the universe You ll see the world around you as you ve never seen it before Evolution 2.0 pinpoints the central mystery of biology offering a multimillion dollar technology prize at naturalcode.org to the first person who can solve it

The Behavior, Ecology and Evolution of Cichlid Fishes Maria E. Abate,David L.G. Noakes,2021-09-19 This volume constitutes the most recent and most comprehensive consideration of the largest family of bony fishes the Cichlidae This book offers an integrated perspective of cichlid fishes ranging from conservation of threatened species to management of cichlids as invasive species themselves Long standing models of taxonomy and systematics are subjected to the most recent applications and interpretations of molecular evidence and multivariate analyses and cichlid adaptive radiations at different scales are elucidated The incredible diversity of endemic cichlid species in African lakes is revisited as possible examples of sympatric speciation and as serious cases for management in complex anthropogenic environments Extreme hydrology and bathymetry as driver of micro allopatric speciation is explored in the African riverine hotspot of diversity of the lower Congo River Dramatic new molecular evidence draws attention to the complex taxonomy and systematics of Neotropical cichlids including the crater lakes of Central America Molecular genetics genomics imaging tools and field study techniques assess the roles of natural sexual and

kin selection in shaping cichlid traits and beyond The complex behavioral adaptations of cichlids are considered from a number of sub disciplines including sensory biology neurobiology development and evolutionary ecology Most importantly this volume puts forth a wealth of new interpretations explanatory hypotheses and proposals for practical management and applications that will shape the future for these remarkable fishes in nature as well as their use as models for the study of biology

The Work of Language in Multicultural Classrooms Katherine Richardson Bruna, Kimberley Gomez, 2009-06-02

How does language comprise the implicit or explicit curriculum of teaching and learning in multicultural science settings Building on a growing interest in the ways in which language and literacy practices interact with science teaching and learning to facilitate or obstruct successful student outcomes this book contributes to scholarship on the role of language in developing classroom scientific communities of practice expands that work by highlighting the challenges faced specifically by ethnic and linguistic minority students and their teachers in joining those communities and showcases exemplary teaching and research initiatives for helping to meet these challenges Offering teacher practitioners and researchers in the fields of science education and multicultural education lenses through which they can critically consider the myriad of classroom settings instructional approaches curricular materials and scientific topics involved in what it means to teach science while pointedly addressing concerns about equity of educational opportunity this volume serves as a powerful resource for linking theory and practice End of chapter reflection questions and engagement activities facilitate discussion round these issues and provide rich opportunities for the reader to consider the implications of each chapter for science instruction and research and to apply insights developed in a real world science teaching and learning contexts

Recounting the Anthrax Attacks R. Scott Decker, 2018-03-19 It was September 18 2001 just seven days after al Qaeda hijackers destroyed the Twin Towers In the early morning darkness a lone figure dropped several letters into a mailbox Seventeen days later a Florida journalist died of inhalational anthrax The death from the rare disease made world news These anthrax attacks marked the first time a sophisticated biological weapon was released in the United States It killed five people disfigured at least 18 more and launched the largest investigation in the FBI s history *Recounting the Anthrax Attacks* explores the origins of the innovative forensics used in this case while also explaining their historical context R Scott Decker s team pursued its first suspect with dogged determination before realizing that the evidence did not add up With renewed energy they turned to non traditional forensics scientific initiatives never before applied to an investigation as they continued to hunt for clues These advances formed the new science of microbial forensics a novel discipline that produced critical leads when traditional methods failed The new technologies helped identify a second suspect one who possessed the knowledge and skills to unleash a living weapon of mass destruction Decker provides the first inside look at how the investigation was conducted highlighting dramatic turning points as the case progressed until its final solution Join FBI agents as they race against terror and the ultimate insider threat a decorated government scientist releasing powders of deadly anthrax Walk in the steps of
