vacillate over what to do mindful of the opposing and competing political and environmental agendas that could derail the whole process In Europe there is much talking and procrastinating while in the USA the Vice President begins to position himself to take over from an increasingly unpopular President Ever determined to stay one step ahead of the Old World the US turns to its main technology partner who is the world leader in the embedded chip technology Both powers extol the virtues of this interface which allows the user to access the internet and to maintain contact with family friends and work colleagues by providing a direct connection between the brain and outside communications It revolutionises living in the States Europeans are less embracing going for the more limited Omni chip over the American Zeus chip which provides an always on connection After a powerful demonstration of its capabilities the US Government commits itself to a covert operation over which it finds it has increasingly less control It s own Senate Committee investigations on environmental change challenge the wisdom of the country s stance but the two key witnesses soon realise they are fighting a losing battle with all save perhaps the chairperson When the deaths begin mysterious and without apparent cause detectives in Europe seek to find out who might be behind the apparently unconnected but similar sudden deaths In the US secret services agencies wonder whether they can stay on top of the increasing number of human infiltrations that threaten the very security of the country and the military stability of the world

**KEY CHARACTERS**
