Paper 3 (Creative Writing)

Section A: Essay

Narrative Essay:

- A narrative essay deals with a person/people and what happened to him/her/them/me/us.
- It is usually written in the past tense.
- The value of the essay increases if the story is interesting and captures the imagination with a surprising ending.
- Including a bit of humor sometimes makes the essay interesting, depending on the relevance of such a topic.
- If the story is interesting (coupled with applicable language), the value of the essay will be higher.
- Can descriptive elements appear in a narrative essay? Of course! It is the authentic and convincing elements of your story that count.

Descriptive essay:

- In a descriptive essay, you must describe something, for example, a person, place, situation, experience, emotion, or object.
- Observation plays an important role – whether you describe your emotions, nature, a person/people, or whatever else – how you put it in words is crucial.
- The creation of an appropriate atmosphere/mood increases the value of the essay. Try to use as many of the senses as possible in your description.
- Avoid deliberate, fancy/glamorous language – it is not convincing. Rather opt for simple language that carries meaning clearly.
- Authenticity and sincerity add a lot of value to a descriptive essay.
- The fresher/more precise the observation and the more secure/more effective the observation, the higher the value of the essay.

Argumentative essay:

- An argumentative essay is subjective and makes a case in favor of, or against, a specific point of view and maintains that view from the first paragraph until the last sentence.
- It's important to distinguish between argumentative and discursive essays because they are not the same.
- The aim is to convince the reader to agree with your opinion.
- Usually, statements are made on a preconceived point of view and motivations are provided to support the statements.
- It is usually written in the present tense.
- The language used can sometimes be more formal than in the case of a narrative essay, but this is not a prerequisite – it depends on the nature of the issue that is being argued.
- Facts usually play a more important role than in (for example) a descriptive essay.
- Never belittle or insult in an argumentative essay – respect for the dignity of the other side must at all times be maintained.
- The stronger the arguments and motivations (without exaggeration and over-emotionality), the stronger the essay will address the reader.

Left Out Kimberley Reynolds, 2016 Left Out presents an alternative and corrective history of writing for children in the first half of the twentieth century Between 1910 and 1949 a number of British publishers writers and illustrators included children s literature in their efforts to make Britain a progressive egalitarian and modern society Some came from privileged backgrounds others from the poorest parts of the poorest cities in the land some belonged to the metropolitan intelligentsia or bohemia others were working class autodidacts but all sought to use writing for children and young people to create activists visionaries and leaders among the rising generation Together they produced a significant number of both politically and aesthetically radical publications for children and young people

This radical children's literature was designed to ignite and underpin the work of making a new Britain for a new kind of Briton. While there are many dedicated studies of children's literature and children's writers working in other periods, the years 1910-1949 have previously received little critical attention. In this study, Kimberley Reynolds shows that the accepted characterization of interwar children's literature as retreatist, anti-modernist, and apolitical is too sweeping and that the relationship between children's literature and modernism, left-wing politics, and progressive education has been neglected.

Globalization and Animal Law Thomas G. Kelch, 2017-05-01. The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from hunter-gatherer to agricultural society. In today's global markets, multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale. The philosophical and legal notions that animals are mere unfeeling machines or pieces of property, although more or less taken for granted for centuries, has been challenged if not burst asunder in recent decades. In law, moral philosophy, and cognitive and other sciences, and regulation of the treatment of animals in agriculture, experimentation, entertainment, and other areas, has begun to make substantial inroads in national and international law. This book provides a detailed analysis of international and comparative animal law, focusing on the impact of today's globalized economy on animal law. Describing a wide range of domestic and international laws relating to the treatment of animals, the author explicates the sorts of legal rules which affect the global animal marketplace. Representative norms in existing animal protection laws are analyzed and critiqued, illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals. Among the issues covered are the following: contemporary philosophical thought on the relationship between humans and animals; recent scientific research relating to cognitive and other abilities of animals; legal issues relating to factory farming and animal slaughter; legal protection of animals during transport; regulatory schemes on animal experimentation; laws on the use of animals in entertainment; laws on protection of companion animals; regulation of trade in endangered species; international trade issues relating to animals, including consideration of the provisions of GATT and the seminal WTO GATT decisions in the Tuna Dolphin, Shrimp, Turtle, Tuna Labeling, and EU Seal Products cases; constitutional protection for the interests of animals; intellectual property law issues relating to animals; efforts to have the legal personhood of certain animals judicially recognized; and what the future may hold for animal law in the global economy. To ensure the consideration of a full range of legal approaches, the laws analyzed come from a wide variety of countries and jurisdictions, including Australia, Austria, Brazil, Canada, the EU, Germany, India, Ireland, New Zealand, Switzerland, the UK, and state and federal laws of the US. Numerous international treaties and conventions relevant to animal treatment and animal law are also covered, including the Berne Convention for the Protection of Literary and Artistic Works, the CITES Convention, the European Convention for the Protection of Animals Kept for Farming Purposes, the European Patent Convention, the GATT Treaty, the TRIPS Agreement, and the Universal Copyright

Convention It is not difficult to grasp given the continuing increases in production consumption and use of animals and animal products worldwide that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought But this is really just the dawn of animal law which has only recently become recognized as an important cutting edge topic and this area of the law promises to develop rapidly in the future This book is enormously valuable in contributing to the continuing development and understanding of this law clearly laying out the contours and boundaries of existing animal laws in our global economy and allowing legal educators concerned lawyers and policymakers to teach formulate proposals argue cases and defenses and secure a firm purchase on future trends and developments in animal law

Living by the Gun in Chad Marielle Debos, 2016-10-15 How do people live in a country that has experienced rebellions and state organised repressions for decades and that is still marked by routine forms of violence and impunity What do combatants do when they are not mobilised for war Drawing on over ten years of fieldwork conducted in Chad Marielle Debos explains how living by the gun has become both an acceptable form of political expression and an everyday occupation Contrary to the popular association of violence and chaos she shows that these fighters continue to observe rules frontiers and hierarchies even as their allegiances shift between rebel and government forces and as they drift between Chad Libya Sudan and the Central African Republic Going further she explores the role of the globalised politico military entrepreneurs and highlights the long involvement of the French military in the country Ultimately the book demonstrates that ending the war is not enough The issue is ending the inter war which is maintained and reproduced by state violence Combining ethnographic observation with in depth theoretical analysis Living by the Gun in Chad is a crucial contribution to our understanding of the intersections of war and peace

Beyond Occupation Virginia Tilley, 2012-09-06 Is Israel following international law This collection looks at three contentious terms that arise in contemporary arguments about Israel s practices towards Palestinians occupation colonialism and apartheid and how they are manipulated by the Israeli state These essays present conclusive evidence that Israel s administration of the Palestinian territories is consistent with colonialism and apartheid Moreover these practices are deliberate Israeli state policies which are imposed on the Palestinian population under military occupation Beyond Occupation raises serious implications for the legality and legitimacy of Israel s continuing occupation highlighting the responsibility of the entire international community
