

Installation

Unpacking

All transit bolts and packing must be removed before using the appliance.

You are advised to keep all transit devices so that they can be refitted if the machine ever has to be transported again.

1. Using a spanner, unscrew and remove the two rear bottom screws. Slide out the two plastic pins. Lay the machine on its back, taking care not to squash the hoses. This can be avoided by placing one of the corner packing pieces between the machine and the floor.

2. Remove the bottom cover placed into the drum of your appliance, lay its hook as the arrow 'A' indicates and push the top of the cover to seal it closed.

3. Set the machine upright and remove the remaining rear screw. Slide out the relevant pin.
4. Plug all the holes with the plugs which you will find in the envelope containing the instruction manual.

Positioning

Install the machine on a flat hard floor. Make sure that air circulation around the machine is not impeded by carpets, rugs etc. Check that the machine does not touch the wall or cupboard units. Carefully level by screwing the adjustable feet in or out. Never place cardboard, wood or similar materials under the machine to compensate for any unevenness in the floor.

Water inlet

Connect the water inlet hose to a tap with 3/4" BSP thread. Use the hose supplied with the washing machine. DO NOT USE OLD HOSES.
