country reform in PIM Clarification of the definition and scope of public investment and public investment management  
Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process  
Allocation of roles and responsibilities for key players in PIM across government Strengthening of guidance on project  
preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies Integration

management and ex post evaluation Integration of PIM and public private partnership PPP in a unified framework  
Rationalization and prioritization of the existing PIM project portfolio Development of a PIM database and information  
technology in the form of a PIM information system The PIM Reference Guide does not seek to provide definitive answers or  
standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed template for replication  
across countries this would be impossible given the diversity of country situations Instead each chapter begins with an  
overview of the specific reform issue lists approaches and experiences from different countries and summarizes the  
references and good practices to be considered in designing country specific reform actions **Resources in Education**
