

COLLEGE SPORTS

As college sports continue to be hugely popular and the National Collegiate Athletic Association (NCAA) brings in large amounts of revenue, people have revived the debate on whether college athletes should get paid.

There are many ways payments could work. They could be in the form of a free-market approach, where athletes are able to earn whatever the market is willing to pay them, it could be a set amount of money per athlete, or student athletes could earn income from endorsements, autographs, and control of their likeness, similar to the way top Olympians earn money.

Proponents of the idea believe that, because college athletes are the ones who are training, participating in games, and bringing in audiences, they should receive some sort of compensation for their work. If there were no college athletes, the NCAA wouldn't exist, college coaches wouldn't receive there (sometimes very high) salaries, and brands like Nike couldn't profit from college sports. In fact, the NCAA brings in roughly \$1 billion in revenue a year, but college athletes don't receive any of that money in the form of a paycheck. Additionally, people who believe college athletes should be paid state that paying college athletes will actually encourage them to remain in college longer and not turn pro as quickly, either by giving them a way to begin earning money in college or requiring them to sign a contract stating they'll stay at the university for a certain number of years while making an agreed-upon salary.

Supporters of this idea point to Zion Williamson, the Duke basketball superstar, who, during his freshman year, sustained a serious knee injury. Many argued that, even if he enjoyed playing for Duke, it wasn't worth risking another injury and ending his professional career before it even began for a program that wasn't paying him. Williamson seems to have agreed with them and declared his eligibility for the NCAA draft later that year. If he was being paid, he may have stayed at Duke longer. In fact, roughly a third of student athletes surveyed stated that receiving a salary while in college would make them "strongly consider" remaining collegiate athletes longer before turning pro.

Paying athletes could also stop the recruitment scandals that have plagued the NCAA. In 2018, the NCAA stripped the University of Louisville's men's basketball team of its 2013 national championship title because it was discovered coaches were using sex workers to entice recruits to join the team. There have been dozens of other recruitment scandals where college athletes and recruits have been bribed with anything from having their grades changed, to getting free cars, to being straight out bribed. By paying college athletes and putting their salaries out in the
