Register Variation Online Douglas Biber, Jesse Egbert, 2018-08-23 While other books focus on special internet registers like tweets or texting no previous study describes the full range of everyday registers found on the searchable web. These are the documents that readers encounter every time they do a Google search: from registers like news reports product reviews travel blogs discussion forums FAQs etc. Based on analysis of a large near-random corpus of web documents this monograph provides comprehensive situational lexical and grammatical descriptions of those registers. Beginning with a coding of each document in the corpus the description identifies the registers that are especially common on the searchable web versus those that are less commonly found. Multi-dimensional analysis is used to describe the overall patterns of linguistic variation among web registers while the second half of the book provides an in-depth description of each individual register including analyses of situational contexts and communicative purposes together with the typical lexical and grammatical characteristics associated with those contexts.

Hollis Frampton Michael Zryd, 2023-05-09 Hollis Frampton was an American filmmaker photographer and theorist who bridged the experimental film and contemporary art worlds in the 1960s and 1970s. Best known for avant-garde films including *Zorns Lemma* 1970 and *Nostalgia* 1971 Frampton spent his later years working on the unfinished epic *Magellan* a monumental cycle that used the metaphor of Ferdinand Magellan's circumnavigation of the world to rethink the nature and meanings of history modernity and cinema. Frampton's career was cut short by cancer at age 48 with his vast ambitions for the project left incomplete. This book is a groundbreaking and comprehensive account of this remarkable figure's work in its totality from Frampton's earliest films through *Magellan*. Michael Zryd explores the connections linking Frampton's art and thought to other media forms histories and cultural frameworks. He foregrounds Frampton's notion of the infinite cinema which redefined the parameters of the medium to encompass all forms of moving image and sound media across the past and future of cinematic possibility. Zryd analyzes Frampton's ambivalent relationship with modernism and the Enlightenment showing how the artist navigated between

attraction to radical artistic investigation and awareness of this tradition's implication in colonialism and other oppressive power structures Shedding new light on Frampton's project of exploring and critiquing how cinema attempts to capture and understand the world this book also considers his significance for contemporary art
