Abstract: Abstracts are short summaries that briefly present the essential highlights, ideas, and key findings of scholarly work published. They serve as concise references and allow scholars to quickly identify relevant literature. Abstracts typically include information such as the author's name, title, journal name, volume, issue, and page numbers. They also provide a brief overview of the research objectives, methodology, results, and conclusions. Abstracts are often used by researchers to stay up-to-date on the latest developments in their field and to find sources for further study.
