

Galaxy Dimension

Alarm & access control panel range

The new Galaxy Dimension series is the next generation of intruder alarms from the established Galaxy range. Based on the market leading Galaxy 3 series, it provides high quality, reliable security solutions for commercial and industrial applications.

New innovative user interface

The Galaxy colour TouchCenter facilitates easy user operation. An intuitive menu gives clear options, and event logs are displayed as a scroll list for easier comprehension. Installers can customise the screen background with their own and the end-user's images and logos. Enhanced controls allow simple centralised operation of electrical appliances such as lights, heating, or window blinds either manually using the touch-screen or automatically via timer control.

Integrated system (Intrusion + Access control)

Galaxy's latest version - Dimension - also now includes enhanced access control features. With one integrated system, operation is simpler for the end user and is easier for the installer to program, commission and maintain. Best for both, one system means one point of contact for technical support.

And always with Honeywell support

As well as sales literature, free training sessions are frequently organised to help system understanding and to ensure trouble free installations every time.

Programming software compatibility

The new Remote Servicing Suite uses a common database to communicate with all Galaxy panels from one program. A networked version of the Remote Servicing Suite is also available to allow access to up to date records for all users. It guarantees secure management of information in one central location.

Backwards compatibility

To allow upgrades of the existing install base, the Galaxy Dimension PCB is fully interchangeable with G3 so the new series of control panels is compatible with all previous Galaxy installations. Programmable zone configuration also allows easy replacement of competitor's panels in many cases.

Audio verification ('Listen-in' Facility)

With the new Galaxy Dimension, the Alarm Receiving Centre (ARC) can listen in using independent audio channels to identify the specific location where the alarm has been triggered and verify source and cause. This reduces false alarms and increases system reliability.

The right choice

Galaxy Dimension, allows you to offer your customer a user - friendly integrated security solution which delivers modern aesthetics in a cost-effective, fully compliant package.

Genomes, Browsers and Databases Peter Schattner,2008-06-16 The recent explosive growth of biological data has lead to a rapid increase in the number of molecular biology databases Held in many different locations and often using varying interfaces and non standard data formats integrating and comparing data from these multiple databases can be difficult and time consuming This book provides an overview of the key tools currently available for large scale comparisons of gene sequences and annotations focusing on the databases and tools from the University of California Santa Cruz UCSC Ensembl and the National Centre for Biotechnology Information NCBI Written specifically for biology and bioinformatics students and researchers it aims to give an appreciation of the methods by which the browsers and their databases are constructed enabling readers to determine which tool is the most appropriate for their requirements Each chapter contains a summary and exercises to aid understanding and promote effective use of these important tools

Beginners Guide To Bioinformatics For High Throughput Sequencing Eric Cheng-yu Lee,Tin Wee Tan,2018-10-05 Biologists find computing bewildering yet they are expected to be able to process the voluminous data available from the machines they buy and the

datasets that has accumulated in genomic databanks worldwide It is now increasingly difficult for them to avoid dealing with large volumes of data that goes beyond just doing manual programming Most books in this realm are full of equations and complex code but this book gives a much gentler entry point particularly for biologists with code snippets users can use to cut and paste and run on their Linux or MacOSX operating system or cloud instance It also provides a step by step installation instructions which they can easily follow Those who are in the field of genome sequencing and already familiar with the procedures of analysis may also find this book useful in closing some knowledge gaps High throughput sequencing requires high throughput and high performance computing This book provides a gentle entry to high throughput sequencing by dealing with simple skills which the average biologist is increasingly required to master You will find this book a breeze to read and some suggestions in this book maybe new to you something you might want to try out [Meddelanden från Astronomiska Observatorium, Uppsala](#) Uppsala universitet, Astronomiska observatoriet,1925 **Monthly Notices of the Royal Astronomical Society** Royal Astronomical Society,1922 Portfolio of 8 charts accompanies v 83 **Panchromatic View of Galaxies** Astronomische Gesellschaft (Germany). The Complete Idiot's Guide to Astronomy Christopher Gordon De Pree, Alan Axelrod, 2004 Astronomy is an ancient science on the cutting edge Although it's been around for more than 5 500 years astronomers say that we've learned more than 90 percent of what we know about the universe in just the last 50 years Of this body of knowledge a disproportionate amount has been acquired in the past decade with each new year yielding more information than the last The Complete Idiot's Guide to Astronomy Third Edition covers these new advances and discoveries and is repositioned to focus more on exciting cutting edge cosmology topics and less on backyard astronomy

Elementary Particles and the Early Universe Eitan Abraham, Andrés J. Kreiner, 2022-12-21 The birth of the Universe and its subsequent evolution is an exciting blend of Cosmology Particle Physics and Thermodynamics This book with its synoptic approach provides an accessible introduction to these fascinating topics It

begins in Part I with an overview of cosmology and is followed by a discussion on the present understanding about the birth of the universe detailing the Planck Era Inflation and the Big Bang It speculates the possibility of multiple universes Before moving on to explore the essentials of the Standard Model of Particle Physics in Part II with particular stress on the electroweak force the first example of acquisition of mass by gauge bosons via the Higgs mechanism The book finishes in Part III with the thermal history of the Universe This will also lead to understanding baryonic matter and baryogenesis as well as nucleosynthesis This book is suitable for those taking courses on particle physics general relativity and cosmology Readers mathematically inclined who wish to enhance their basic knowledge about the early Universe will also find this book suitable to move up to the next level Features Authored by experienced lecturers in Particle Physics Quantum Field Theory Nuclear Physics and General Relativity Provides an accessible introduction to Particle Physics and Cosmology **NASA Conference Publication** ,1990 The Messenger ,1995 **Stellar Populations** Piet C. van der Kruit,Gerry Gilmore,2013-12-01 The concept of Stellar Populations has played a fundamental role in astronomy in the last few decades It was introduced by Walter Baade after he was able to resolve the Andromeda Nebula and its companions into stars when he used red sensitive plates and realised that there were two fundamentally different Hertzsprung Russell diagrams in our and these nearby galaxies common stars in the solar neighborhood versus globular clusters This result was published in two papers in 1944 in volume 100 of the Astrophysical Journal Subsequent research gave the concept a much firmer basis and at the famous Vatican Symposium of 1957 resulted in a general scheme of the concept and a working hypothesis for ideas on the formation and evolution of the Galaxy This has been a guiding principle of studies of our and other galaxies for decades Some years ago it seemed to us appropriate to commemorate Baade's seminal work in 1994 when it would have its 50th anniversary and to review its present status and also its role in contemporary understanding While we were in Leiden for an administrative committee we discussed the matter again and over beers on October 29 1991 we decided to take the initiative for an IAU Symposium on the subject during the 1994 IAU General Assembly in Den Haag the Netherlands The Many Facets of Cosmic Explosions Alicia Soderberg,2007-10 Over the past few years long duration gamma ray bursts GRBs including the subclass of X ray flashes XRFs have been revealed to be a rare variety of Type Ibc supernova SNe Ibc While all these events result from the death of massive stars the electromagnetic luminosities of GRBs and XRFs exceed those of ordinary Type Ibc SNe by many orders of magnitude The observed diversity of stellar death corresponds to large variations in the energy velocity and geometry of the explosion ejecta Using multi wavelength radio optical X ray observations of the nearest GRBs XRFs and SNe Ibc I show that GRBs and XRFs couple at least 10^{48} erg to relativistic material while SNe Ibc typically couple less than 10^{48} erg to their fastest albeit non relativistic outflows Specifically I find that less than 3 percent of local SNe Ibc show any evidence for association with a GRB or XRF Interestingly this dichotomy is not echoed by the properties of their optical SN emission dominated by the radioactive decay of Nickel 56 I find that GRBs XRFs and SNe Ibc

show significant overlap in their optical peak luminosity and photospheric velocities Recently I identified a new class of GRBs and XRFs that are under luminous in comparison with the statistical sample of GRBs Owing to their faint high energy emission these sub energetic bursts are only detectable nearby z

Proceedings Of 12th Potsdam Cosmology Workshop Volker Muller, Stefan Gottlober, Jan P Mucket, Joachim

Wambsganss, 1998-08-08 Understanding the largest physical structures in the universe is essential for the comprehension of the cosmos as a whole We want to know how our world is formed what it is made of and how it evolves Galaxies as the most visible constituents of the universe are interesting probes for the cosmic time sequence Their formation and development provides us with unique clues to the cosmic evolution This is tightly connected with the hierarchical cosmic structure groups and clusters of galaxies and their embedding into the large scale structure offer the opportunity to study the dependencies Galaxy redshift surveys delineate most impressively a large cosmic web which is composed of sheets and filaments Grand simulations of the cosmic evolution complement these observations from the theoretical side and allow one quantify and compare various model universes Quasar absorption line studies gravitational lensing and even the X ray background radiation provide important quantitative measures of the history of matter clustering Finally the microwave radiation traces very early structures which are supposed to originate in the phase of inflationary expansion shortly after the big bang This volume constituting the proceedings of the 12th Potsdam Cosmology Workshop deals with the basic aspects of cosmological structure formation on the largest physical scales
