MULTI-PATTERN ELECTRONIC FLASHER Q-SWITCH (ETQ240N)

Congratulations! You are now the proud owner of the most technologically advanced Alternating Headlight Flasher System on the market today. Add to your never ending commitment to quality. This new Flasher System will provide you with years of dependable trouble-free service.

This Q-Switch will operate a two or four headlight system on any vehicle with a 12 VDC negative ground system.*

NOTE:

This Flasher will not work on any ground switched system. If you have any questions regarding what type of system your vehicle has, please contact T-Flasher's Technical Support Department at 1-800-248-1337.

A properly installed Q-Switch will continuously cycle through three flash patterns on a vehicle's high-beam lights: a double flash (avg. w/ avg. time of 1.1 flashes per second), a single flash (avg. w/ avg. time of 1.0 flashes per second) and a fast w/ avg. w/ avg. time of 3.8 flashes per second. When used at night, these beam headlights remain ON for proper illumination while the high beams flash to gain attention and increase the vehicle's visibility. When the driver switch is actuated to high-beam, the flasher system's "High-Beam Override" interrupts the flasher sequence to allow for normal high beam function. Flashing automatically resumes when the driver switch is deactivated.

NOTE:

Flashing Headlight and Tailight Systems are intended for use on equipped vehicles only. It is the responsibility of the user of these systems to insure compliance to any Federal, State or Municipal regulations which apply.

INSTALLATION

GROUNDING: Mount the flasher near the battery at the front of the engine compartment.

GREEN WIRE: Connect to a convenient vehicle ground.

BLUE AND YELLOW WIRE: Locate the wire that supplies power to the passenger side high beam headlight. Cut this wire approximately 12" to 12 1/2" from the back of the headlight. Connect the yellow wire (which then returns to the passenger side high beam). Connect the blue wire to the other piece of the cut wire. This will make the driver side high beam flash.

Wiring Schematic - 4 Lamp Install

Wiring Schematic - 2 Lamp Install

RED WIRE: Connect to a powered switch. This switch will only require 14 awg to activate the flasher.

WHITE WIRE: Connect through an AFDC type fuse (25 amp) to the positive post of the battery. DO NOT USE A CIRCUIT BREAKER, FUSE-LINK OR SLOW BLOW TYPE FUSE.
