All About History Teaching Dr. Venkat Rao Palati, 2014-08-03 Teaching history is quite different to teaching other subjects. How Students Learn National Research Council, Division of Behavioral and Social Sciences and Education, Committee on How People Learn, A Targeted Report for Teachers, 2004-12-23 How do you get a fourth grader excited about history? How do you even begin to persuade high school students that mathematical functions are relevant to their everyday lives? In this volume, practical questions that confront every classroom teacher are addressed using the latest exciting research on cognition, teaching and learning. *How Students Learn: History, Mathematics and Science in the Classroom* builds on the discoveries detailed in the bestselling *How People Learn*. Now these findings are presented in a way that teachers can use immediately to revitalize their work in the classroom for even greater effectiveness. Organized for utility, the book explores how the principles of learning can be applied in teaching history, science and math topics at three levels: elementary, middle and high school. Leading educators explain in detail how they developed successful curricula and teaching approaches, presenting strategies that serve as models for curriculum development and classroom instruction. Their recounting of personal teaching experiences lends strength and warmth to this volume. The book explores the importance of balancing students' knowledge of historical fact against their understanding of concepts such as change and cause and their skills in assessing historical accounts. It discusses how to build straightforward science experiments into true understanding of scientific principles. And it shows how to overcome the difficulties in teaching math to generate real insight and reasoning in math students. It also features illustrated suggestions for classroom activities. *How Students Learn* offers a highly useful blend of principle and practice. It will be important not only to teachers, administrators, curriculum designers and teacher educators but also to parents and the larger community concerned about children's education.

Researching History Education Linda S. Levstik, Keith C. Barton, 2018-02-06 The authors research is well known and among the most important American works being done on how children learn history It is thus a great idea to gather this pivotal research in one place The volume offers a new perspective through the authors reflections on the research process It is profound without pomposity ideal for the intended audience the tone is just right There really isn t another book that does what this one does Stephen J Thornton University of South Florida Researching History Education combines a selection of Linda Levstik s and Keith Barton s previous work on teaching and learning history with their reflections on the process of research These studies address students ideas about time evidence significance and agency as well as classroom contexts of

history education and broader social influences on students and teacher s thinking These pieces widely cited in history and social studies education and typically required reading for students in the area were chosen to illustrate major themes in the authors own work and trends in recent research on history education In a series of new chapters written especially for this volume the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume theory method and context Although research on children s and adolescents historical understanding has been the most active area of scholarship in social studies in recent years as yet there is little in depth attention to research methodologies or to the perspectives on children history and historical thinking that these methodologies represent This book fills that need The authors hope is that it will help scholars draw from the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history Researching History Education provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses both in social studies and more generally because of its emphasis on techniques for interviewing children the impact of theory on research and the importance of cross cultural comparisons
