Life Science Focus Memorandum November 2014:

The Truth Pill Dinesh Singh Thakur, Prashant Reddy Thikkavarapu, 2022-10-10 Since 2004 when the fraud at Ranbaxy the largest Indian pharmaceutical company at the time first came to light the Indian pharmaceutical industry and clinical research organizations have been rocked by a series of scandals after investigations by American and European drug regulators While the West has responded to concerns about quality of Made in India medicine by blocking exports from many Indian pharmaceutical companies the Indian government responded not with regulatory reform but conspiracy theories about vested interests working against India More worryingly the Indian state has also turned a blind eye to a far more serious quality crisis in its domestic pharmaceutical market At times these quality issues manifest themselves in the deaths of Indian citizens as happened in early 2020 when 11 children died in Jammu because of adulterated cough syrup On other occasions a dodgy drug approval process has led to the Indian regulator approving sales of drugs that have never been approved by regulators in the developed markets The result is not just poor health outcomes but outsize profits for pharmaceutical companies manufacturing medicines that have never been validated through scientifically rigorous clinical trials for therapeutic evidence These twin crises in both the domestic and export markets is because India has either outdated regulations or no regulations in some areas Even the outdated regulations are enforced with kid gloves by drug inspectors and judicial magistrates who are ready to forgive even those whose drugs are found to contain barely any active ingredient or dangerously high levels of bacterial endotoxins In a race for growth of the pharmaceutical industry the Indian state has sacrificed scientific rigour and ignored the basic principles of public health Given India's position as the pharmacy of the developing world the failure of the Indian state is a problem for not just India but most of the developing world This timely important and compelling book based on deep research questions and analyzes the actions of the institutions that are responsible for the safety and efficacy of the Indian drug supply in the context of the historical evolution of the Drugs Act 1940 from pre Independence India to the present day The future of Indian public health lies in responding to the issues raised in this book

Attachments to War Jennifer Terry,2017-10-19 In Attachments to War Jennifer Terry traces how biomedical logics entangle Americans in a perpetual state of war Focusing on the Afghanistan and Iraq wars between 2002 and 2014 Terry identifies the presence of a biomedicine war nexus in which new forms of wounding provoke the continual development of complex treatment rehabilitation and prosthetic technologies At the same time the U S military rationalizes violence and military occupation as necessary conditions for advancing medical knowledge and saving lives Terry examines the treatment of war generated polytrauma postinjury bionic prosthetics design and the development of defenses against infectious pathogens showing how the interdependence between war and biomedicine is interwoven with neoliberal ideals of freedom democracy and prosperity She also outlines the ways in which military sponsored biomedicine relies on racialized logics that devalue the lives of Afghan and Iraqi citizens and U S veterans of color Uncovering the mechanisms that attach all Americans to war and highlighting their embeddedness and institutionalization in everyday life via the government media biotechnology finance and higher education Terry helps lay the foundation for a more meaningful opposition to war Focus On: 100 Most Popular American Agnostics Wikipedia contributors, **Chinese Research Perspectives on Educational Development,**

His range of roles included a Virginia gentleman planter in Colonial Williamsburg, The Story of a Patriot, CIA agent Felix Leiter in the first James Bond movie Dr. No, and the title character in the cult classic rodeo TV series Stoney Burke. Lord's career culminated in twelve seasons on Hawaii Five O, where his creative control of the series left an indelible mark on every aspect of its production. This book, the first to draw on Lord's massive personal archive, gives a behind-the-scenes look into the life and work of a TV legend.

Review of Report and Approach to Evaluating Long-Term Health Effects in Army Test Subjects National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee to Review Report on Long-Term Health Effects on Army Test Subjects, 2018-02-23 Between 1942 and 1975, the U.S. Army conducted tests with human subjects to study the effects of a variety of agents, including chemical warfare and biological agents. The potential long-term health effects on the test subjects from their exposures have been evaluated periodically, most recently in a report titled Assessment of Potential Long-Term Health Effects on Army Human Test Subjects of Relevant Biological and Chemical Agents: Drugs, Medications, and Substances Literature Review and Analysis. The Report, which was prepared by a contractor to assist the Army with making determinations about providing medical care to former test subjects, was prepared in response to a request by the Army. The National Academies of Sciences, Engineering, and Medicine formed a committee that was tasked with examining whether the Report appropriately identified potential long-term health effects from exposure to the test agents and whether an adequate weight of evidence approach was used to characterize the strength of the associations between the agents and their potential health effects. The committee was made aware at its first meeting on November 30, 2017, that the Army had already begun to receive applications for medical care and that some determinations may need to be made before the committee's evaluation of the Report was completed. Because of this urgency, the Army developed a process by which applications for medical care will be reviewed, and as a result, the committee was given the additional task of reviewing the Army's Memorandum that describes the approach that will be used by the Army to evaluate agent- and outcome-specific associations. This interim report was prepared to facilitate the Army's deliberations. A
