It addresses the questions: How useful are L2 writing courses for the students who are required to take them? What do the students carry with them from these courses to their other disciplinary courses across the curriculum? What happens to these students after they leave ESL English or writing classes? Drawing on data from a 5-year longitudinal study of four university students for whom English was not their strongest primary language, it captures their literacy experiences throughout their undergraduate careers. The intensive case studies answer some questions and raise others about these students' academic development as it is entwined with their social experiences and identity formation and with the ideological context of studying at a US university in the 1990s. **...
