Leitner,1991-11-15 Until recently grammars of English have received surprisingly little scholarly attention while a lot of
research is done on dictionaries It appears however that learners of English shy away from modern grammars and prefer to
consult dictionaries or traditional reference grammars instead This raises questions as to the relationship between
theoretical linguistics and grammar writing and calls for more research into this area especially for the period from 1800
onwards which was crucial for the development of grammatical thinking and its acceptance or rejection at all educational
levels today This volume brings together work from international experts on the historiography of English grammar writing
who deal with a variety of topics grouped into three overlapping sections I Native Grammars of English II Non native
Grammars of English and III Grammatical Analyses The volume includes summaries of the articles and a name index
