Nord,2014-07-01 Warren Nord s thoughtful book tackles an issue of great importance in contemporary America the role of religion in our public schools and universities According to

Nord public opinion has been excessively polarized by those religious conservatives who would restore religious purposes and practices to public education and by those secular liberals for whom religion is irrelevant to everything in the curriculum. While he maintains that public schools and universities must not promote religion, he also argues that there are powerful philosophical, political, moral, and constitutional reasons for requiring students to study religion. Indeed, only if religion is included in the curriculum will students receive a truly liberal education, one that takes seriously a variety of ways of understanding the human experience. Intended for a broad audience, Nord's comprehensive study encompasses American history, constitutional law, educational theory and practice, theology, philosophy, and ethics. It also discusses a number of current controversial issues, including multiculturalism, moral education, creationism, academic freedom, and the voucher and school choice movements.

**Creation: "Behold, it was very good."** Richard Schaefer, 2019-10-28 Author Richard A. Schaefer was a lifelong communicator fascinated by stories and like any good journalist dug for the facts and verified sources exploring nagging questions such as: Is creation or evolution more credible based on science and expert opinions? This book truly represented a personal passion of looking at all sides of the CREATION vs EVOLUTION issue. He called on many experts and theorists, including Charles Darwin himself. Surprisingly, Darwin was far more skeptical of his own theories than are many PhDs today and admitted to significant holes in his logic. Read for yourself as great thinkers explore the pros and cons of both theories and their variants.

*Reproductive Technologies and Biobanking for the Conservation of Amphibians* Aimee J. Silla, Andy J. Kouba, Harold Heatwole, 2022-10-03 How to decelerate loss of global biodiversity is one of the greatest challenges of our generation. Reproductive technologies have enormous potential to assist the recovery of species by enhancing reproductive output, facilitating genetic management, and supporting reintroduction of threatened species. Of particular value are cryopreservation technologies coupled with the establishment of global gene banks to conserve in perpetuity the remaining extant genetic diversity of threatened amphibians. *Reproductive Technologies and Biobanking for the Conservation of Amphibians* brings together leading experts in the field to provide a comprehensive overview of current best practices, summarise technological advancements, and present a framework for facilitating the integration of reproductive technologies and biobanking into conservation breeding programs for threatened amphibians. It is an invaluable reference for the next generation of conservation practitioners, captive breeding facilities, researchers, and policy makers involved with biodiversity conservation.

*Evolution* Jay Mathers Savage, 1969      *Spontaneous Evolution* Bruce H. Lipton, PHD, Steve Bhaerman, 2010-08-01 We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In *Spontaneous Evolution*, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how

each of us can participate in this global shift In collaboration with political philosopher Steve Bhaerman Dr Lipton invites readers to reconsider the unquestionable pillars of biology including random evolution survival of the fittest and the role of DNA the relationship between mind and matter how our beliefs about nature and human nature shape our politics culture and individual lives and how each of us can become planetary stem cells supporting the health and growth of our world By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo we can trigger the spontaneous evolution of our species that will usher in a brighter future      *Under God* Garry Wills, 2007-09-25 One of our most distinguished political commentators author of *Reagan's America* offers a rich original look at why religion and politics will never be separate in the United States      **Modern Biology** Albert Towle, 1989
