Reinventing the Heartland Nicholas Lalla, 2025-03-04 The story of one Heartland city s efforts to reinvent itself for the innovation age is a powerful example of the change America needs Every city in America wants to become a tech hub yet so few succeed and that s the problem Tech jobs venture capital and R D are concentrated in a handful of big coastal cities while the broad middle of the country is left out But to thrive in the twenty first century cities must create innovation economies of their own and grow in more inclusive ways In January 2020 Nicholas Lalla founded Tulsa Innovation Labs to help Tulsa Oklahoma transition from its oil and gas legacy to tech Lalla s organization would go on to build the first tech led economic development strategy in northeast Oklahoma s history raise over 200 million and create thousands of tech jobs This success catalyzed a massive city wide endeavor the first time in American history a city has dedicated itself in such a concerted way to becoming a player in the innovation economy Drawing upon Lalla s experience in Tulsa Reinventing the Heartland lays out a bold and pragmatic plan for urban reinvention showing cities how to reorient their entire civic ecosystems toward inclusive tech led growth Each chapter covers a core plank of the action plan from how cities can establish their own tech niche based on existing assets to how they can rapidly up skill talent in the era of AI to how to build urban rural partnerships and compete for federal funding as a region In Reinventing the Heartland Lalla provides the path forward not just for Tulsa but for any city ready to embrace the future

Ecologies Design Maibritt Pedersen Zari, Peter Connolly, Mark Southcombe, 2020-07-07 The notion of ecology has become central to contemporary design discourse This reflects contemporary concerns for our planet and a new understanding of the primary entanglement of the human species with the rest of the world The use of the term ecology with design tends to refer to how to integrate ecologies into design and cities and be understood in a biologically scientific and technical sense In practice this scientific technical knowledge tends to be only loosely employed The notion of ecology is also

often used metaphorically in relation to the social use of space and cities This book argues that what it calls the biological and social senses of ecology are both important and require distinctly different types of knowledge and practice It proposes that science needs to be taken much more seriously in biological ecologies and that social ecologies can now be understood non metaphorically as assemblages Furthermore this book argues that design practice itself can be understood much more rigorously productively and relevantly if understood ecologically The plural term ecologies design refers to these three types of ecological design This book is unique in bringing these three perspectives on ecological design together in one place It is significant in proposing that a strong sense of ecologies design practice will only follow from the interconnection of these three types of practice Ecologies Design brings together leading international experts and relevant case studies in the form of edited research essays case studies and project work It provides an overarching critique of current ecologically oriented approaches and offers evidence and exploration of emerging and effective methods techniques and concepts It will be of great interest to academics professionals and students in the built environment disciplines
