The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Parliament. House of Commons. Education Committee, 2012 Additional written evidence is contained in Volume 3 available on the Committee website at www.parliament.uk/education-committee Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research *Human Resource Management, 11th Edition* Raymond J. Stone, Anne Cox, Mihajla Gavin, Joseph Carpini, 2024-06-04 The new edition of Raymond Stone's Human Resource Management is an AHRI endorsed title that has evolved into a modern relevant and practical resource for first year HRM students This concise 15 chapter textbook gives your students the best chance of transitioning successfully into their future profession by giving them relatable professional insights and encouragement to exercise their skills in authentic workplace scenarios Bad Education: Debunking Myths in Education Philip Adey, Justin Dillon, 2012-10-16 This is an important and welcome book Readers can see the faults of simplistic judgments neglect of evidence dismissal of researchers and injudicious implementation From the foreword by Paul Black We all know that small classes are better than

large classes that children are best taught in groups according to their ability that some schools are much better than others and that we should teach children according to their individual learning styles or do we This book asks awkward questions about these and many other sacred cows of education Each chapter tackles a persistent myth in education confronting it with research evidence and teasing out any kernel of truth which may underlie the myth Leading authors from the world of education each bring analysis and expertise to bear on their chosen subject presenting their argument in an accessible manner based on sound scholarship Some of the conclusions drawn in *Bad Education* are likely to be real eye openers for many teachers and parents who will find some of their basic assumptions about education called into question It is also essential reading for anyone involved in educational policy making or management Contributors Philip Adey Mike Anderson Ed Baines Paul Black Peter Blatchford Margaret Brown Guy Claxton Frank Coffield Justin Dillon Julian Joe Elliott Simon Gibbs Jeremy Hodgen Neil Humphrey Annette Karmiloff Smith Bill Lucas Bethan Marshall Brian Matthews Corinne Reid Rob Webster Dylan Wiliam As education policymakers it can be difficult to resist the comfort of our own experience and gut instincts or the lure of populism *Bad Education* is an invaluable myth buster that tears down common misconceptions and serves up hard facts in their place This is a politically unpalatable guide to the evidence that will challenge policymakers the press and parents alike Dale Bassett Head of Public Policy AQA This book should become a manifesto for change for all of those in education who want to ensure our children do not receive a *Bad Education* Every Headteacher should buy a copy for every teacher and hopefully somebody might even place a copy under the Secretary of State's Xmas tree Gary Phillips Head Teacher Lilian Bayliss School This is a welcome and important book It takes apart the myths which support the dearly held convictions simplistic assumptions prejudices and irrational certainties of both politicians and teachers Admitting that education is not itself a science but demonstrating how both neuroscience and psychology have become available to inform educational policy and practice it should provide food for more careful and well informed thought to all who can influence what happens in our schools Baroness Perry of Southwark

Preschool Geometry Esther Levenson, Dina Tirosh, Pessia Tsamir, 2012-01-01 Recently the issue of early childhood mathematics has come to the fore and with it the importance of teaching geometrical concepts and reasoning from a young age Geometry is a key domain mentioned in many national curricula and may also support the learning of other mathematical topics such as number and patterns This book is based on the rich experience research and practice of the authors and is devoted entirely to the learning and teaching of geometry in preschool The first part of the book is dedicated to children's geometrical thinking building concept images in line with concept definitions and the dilemmas that arise in the process The second part focuses on geometrical tasks and their role in developing and assessing geometrical reasoning The third part focuses on teaching geometry to young children Each of the three parts is structured in a similar manner beginning with general theory and research continuing with specific examples related to those theories and moving on to elements of actual practice Written in a meaningful yet enjoyable manner any

person who has an interest in the mathematics education of preschool children be it parents caregivers teachers teacher educators and researchers will find this book relevant **The Times Index** ,2008 Indexes the Times and its supplements

New Frontiers for College Education Jim Gallacher,Fiona Reeve,2018-08-06 The college sector is facing a growing number of new challenges caused by technological change globalisation and the growth of mass higher education *New Frontiers for College Education* considers the impact these changes have had and explores the developing role of college education in countries throughout the world Whilst analysing the issues associated with providing high quality vocational education and training the book also reflects on the role of colleges in widening access to both further and higher education Drawing together contributions from leading international academics policymakers and practitioners the book explores common themes across these diverse societies as well as some of the key challenges experienced within individual countries It considers the distinctive contributions that colleges can make in responding to these challenges through apprenticeships and other types of vocational education and training Contributors discuss the growing emphasis on creating more integrated systems of tertiary education recognising that colleges and universities are now expected to work more closely together and that these diverse demands can be difficult to reconcile Providing an authoritative and timely analysis of the changing role of colleges in contemporary society this book will be of great interest to academics researchers and postgraduate students in the areas of further and higher education vocational education and training lifelong learning and skills development It should also be essential reading for policymakers as well as practitioners working in colleges and other institutions of higher and further education **Parliamentary Debates (Hansard)**. Routledge International Handbook of Educational Effectiveness and Improvement Christopher Chapman,Daniel Muijs,David Reynolds,Pam Sammons,Charles Teddlie,2015-08-14 The International Handbook of Educational Effectiveness and Improvement draws together leading academics and researchers in the field to reflect on the history traditions and the most recent developments in this dynamic and influential field This handbook provides a comprehensive overview of the foundations of the field the evolution of educational effectiveness theory and methodology the links with other research disciplines the links between policy and practice In conclusion the handbook sets out a new agenda for future educational effectiveness research This handbook is an essential resource for those interested in the effectiveness of educational systems organisations and classrooms It offers academics researchers students and policy makers new insights into the latest thinking and evidence about educational effectiveness **Ebony** ,2005-09 EBONY is the flagship magazine of Johnson

Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine *The English Baccalaureate* Great Britain: Parliament: House of Commons: Education Committee,2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public something which didn t happen with

the English Baccalaureate EBac The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac They want the Government to deliver on its promise in the White Paper The Importance of Teaching to use performance tables to put greater emphasis on the progress of every child The report notes that certain academic subjects studied at A level are more valued by Russell Group universities than others but argues that a focus on a fairly narrow range of subjects demanding considerable curriculum time is likely to have negative consequences on the uptake of other subjects The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac s composition when the National Curriculum Review is concluded The Government should confirm how it will monitor the attainment of children on free school meals in the EBac The report also calls for further international evidence to inform debate on the merits of the EBac evidence the inquiry received did not suggest a link in other countries between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students Elsewhere the report argues that the current arrangements for certification of the EBac should be shelved as should calls for a Technical Baccalaureate to sit alongside the existing award
