**Approximation Theory and Approximation Practice, Extended Edition** Lloyd N. Trefethen, 2019-01-01 This is a textbook on classical polynomial and rational approximation theory for the twenty-first century. Aimed at advanced undergraduates and graduate students across all of applied mathematics, it uses MATLAB to teach the field's most important ideas and results. Approximation Theory and Approximation Practice, Extended Edition differs fundamentally from other works on approximation theory in a number of ways: its emphasis is on topics close to numerical algorithms; concepts are illustrated with Chebfun; and each chapter is a PUBLISHable MATLAB M-file available online. The book centers on theorems and methods for analytic functions which appear so often in applications rather than on functions at the edge of discontinuity.

with their seductive theoretical challenges Original sources are cited rather than textbooks and each item in the bibliography is accompanied by an editorial comment In addition each chapter has a collection of exercises which span a wide range from mathematical theory to Chebfun based numerical experimentation This textbook is appropriate for advanced undergraduate or graduate students who have an understanding of numerical analysis and complex analysis It is also appropriate for seasoned mathematicians who use MATLAB

**Myths and Legends of Mastery in the Mathematics Curriculum** Pinky Jain, Rosalyn Hyde, 2020-03-30 This book helps you understand what mastery is and how to effectively integrate it into classroom teaching It explores how mastery is viewed and supported in other countries and encourages a critical examination of this topical theme The book includes practical advice and examples of learning activities for primary teaching It also outlines how to support children who might be weaker in their mathematical abilities and still ensure that all children master mathematics The text also supports those who are developing whole school mastery approaches and looks at how we can assess mastery as well as how we can be confident that it is supporting good progress
