Perspectives Ki-Hoon Lee,Stefan Schaltegger,2018-01-30 This book advances the understanding of corporate sustainability  
and challenges and roles of sustainability accounting in the Asia Pacific region The Asia Pacific region has shown fast  
economic growth for several decades which is expected to continue In this context Asia has become the production engine of  
the global economy At the same time scientific reports reveal that some planetary boundaries are crossed for example  
relating to biodiversity and climate change Companies in the Asia Pacific region are therefore increasingly challenged to  
reduce their environmental impacts to document their social contribution and to contribute to sustainable development Key  
approaches to identify sustainability problems and challenges to support improvement processes and to back up  
sustainability contributions include accounting and reporting In contrast to the high relevance of accounting and reporting  
for corporate sustainability for the Asia Pacific region academic research has so far been dominated by Western researchers  
and pre dominantly dealt with Western and Japanese cases and approaches It is thus time to take account of Asian  
perspectives on accounting and reporting for sustainability in the Asia Pacific region **Questions and answers for job**
