MODEL PROBLEMS continued

- GOAL** A designer is trying to ensure that levels 1 and 2 are parallel in a gutter. It has a sketching tool to draw the bottom floor angle for level 1.

Problem

Construct level 1 using a straightedge.

The designer can use a protractor to construct corresponding angles and parallel lines, as well as a compass and straightedge. Use the straightedge to draw a line segment that represents level 1.

Construct an angle using a protractor.

Place the straightedge to the left of level 1 and construct the angle with a protractor. This particular angle is 120° .

Construct a corresponding angle using a protractor.

Place the protractor down, along the straightedge, and measure a corresponding angle of 120° .

Construct level 2 using the corresponding angles previously created.

Using a straightedge, construct level 2 to the 120° mark on the protractor. Since the corresponding angles are congruent, the levels are parallel.
