for more than a century **Breaking Ranks** Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality Monthly Catalog, United States Public Documents , **School Life** ,1935

Globalization at Risk Gary Clyde Hufbauer,Kati Suominen,2010-10-19 History has declared globalization the winner of the 20th century Globalization connected the world and created wealth unimaginable in the wake of the Second World War But the financial crisis of 2008 09 has now placed at risk the liberal economic policies behind globalization Engulfing the entire world the crisis gave new fuel to the skeptics of the benefits of economic integration Policy responses seem to favor anti globalizers New regulations could balkanize the global financial system while widespread protectionist impulses might undo the Doha Round Issues from climate change to national security may be used as convenient excuses to keep imports out
