New topics in this edition include learning organizations and open systems as a context for understanding how individuals contribute to organizational effectiveness, self-awareness, Goleman's emotional intelligence, and Bridges' transitions model of change. The performance management section has been enhanced with a simplified process model, define, develop, review, and reward, and the section on leadership examines the concept of the versatile leader who engages the spirit, head, heart, and hands of employees. Throughout the course, self-assessments, worksheets, checklists, and questionnaires give students the opportunity to apply what they are learning. Each chapter incorporates an action plan tied to the objectives and competencies for the topic area. Short case studies enable students to apply their new knowledge to analyze, understand, and influence human behavior.
