Reliably remove contaminants

Properly sized tanks, dryers, liquid separators and coalescing filters remove moisture and contaminants from compressed air, but the resulting condensate must be removed from these system components to prevent contamination of pneumatic equipment and products. Kaeser's Automatic Magnetic Drain (AMD) offers ultra-reliable protection for your valuable equipment and products by automatically removing condensate from your air system.

Superior dependability

The AMD 6550 design delivers best in class dependability and needs virtually no maintenance. Unlike traditional float drains, the operating mechanism is completely isolated from condensate so no fouling or sticking occurs. Rugged and corrosion-resistant metal housings offer years of reliable service. Further, these drains maintain a "liquid seal" which prevents compressed air loss and saves you energy.

Flexible and easy to use

The AMD 6550 is suitable for installation throughout your air system on bulk liquid separators and receiver tanks. In large air systems it may also be suitable for coalescing filters, drip legs, and other low points in your air piping. It needs no electricity and a choice of top or bottom condensate inlet offers installation flexibility.
