Social Causes of Psychological

Distress Catherine E. Ross, 2017-07-05 A core interest of social science is the study of stratification inequalities in income power and prestige Few persons would care about such inequalities if the poor powerless and despised were as happy and fulfilled as the wealthy powerful and admired Social research often springs from humanistic empathy and concern as much as from scholarly and scientific curiosity An economist might observe that black Americans are disproportionately poor and investigate racial differences in education employment and occupation that account for disproportionate poverty A table comparing additional income blacks and whites can expect for each additional year of education is thus as interesting in its own right as any dinosaur bone or photo of Saturn However something more than curiosity underscores our interest in the table Racial differences in status and income are a problem in the human sense Inequality in misery makes social and economic inequality personally meaningful There are two ways social scientists avoid advocacy in addressing issues of social stratification The first way is to resist projecting personal beliefs values and responses as much as possible while recognizing that the attempt is never fully successful The second way is by giving the values of the subjects an expression in the research design Typically this takes the form of opinion or attitude surveys Researchers ask respondents to rate the seriousness of crimes the appropriateness of a punishment for a crime the prestige of occupations the fair pay for a job or the largest amount of money a family can earn and not be poor and so on The aggregate judgments and variations in judgments represent the values of the subjects and not those of the researcher They are objective facts with causes and consequences of interest in their own right This work is an effort to move methodology closer to human concerns without sacrificing the scientific grounds of research as such The *Guidance and Counselling* S Nageswara Rao, 2004 Contents Introduction Scope and Sphere Salient Features Various Aspects Counselling for Students Counselling on Education Counselling for Groups Counselling on Social Matters Counselling for the Disabled Counselling on Sentimental Issues Counselling on Mental Issues Counselling for Vocations Present Scenario The Routledge Companion to Alternative Organization Martin Parker, George Cheney, Valérie Fournier, Chris Land, 2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point

is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields Monthly Labor Review ,1978 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews
