**Authentic University** Lawrence Muganga Ph.D.,2022-08-22 Today s universities fail students leaving them stranded in an alien world that differs markedly from the ivory tower institution that ostensibly molded them for the future The Authentic University proposes to overcome the manifold shortcomings of the contemporary postsecondary school by offering an innovative education that corresponds to the realities of the modern era This university blends three distinct concepts of student centered education to provide students with a personalized learning experience that develops distinct skills and competencies required by today s employers Students can save time money and effort while learning the information and applications that they want and need Contained within the covers of this groundbreaking book lies a thorough description of everything that educational stakeholders must know about the Authentic University including supporting literature and practical models alongside strategies for planning and implementation The world has passed the university by and will not wait for education to keep pace with its ever evolving information and communication technology situated in an increasingly entrepreneurial economy We as educational stakeholders must meet the challenge of change in an urgent way The first step toward bringing the university into the modern era begins with this book the manual for a radically new type of education termed the Authentic University Intra-Africa Student Mobility in Higher Education Chika Trevor Sehoole,Jenny J.

Lee,2022-01-01 This book examines student mobility within Africa International student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North North-South Knowledge Networks Towards Equitable Collaboration Between Tor Halvorsen,Jorun Nossun,2017-02-23 Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research For the academic community this strategic shift has had many consequences Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals Debates are ongoing and hotly contested In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships They both question and highlight the agency of academics donors and research institutions in the geopolitics of

knowledge and power The contributors offer fresh insights on institutional transformation the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence Offering a range of perspectives on why academics should collaborate and what for this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make NorthSouth partnerships and collaborations increasingly fair sustainable and mutually beneficial

*Decolonising the Future Academy in Africa and Beyond* Michaela Pelican, Karim Zafer, Michael Bolig, 2025-02-27 What does it mean to decolonise academia in Africa Is this important project limited to the humanities Is it a project for the future Are there forerunners at African universities today The contributors to this volume show different trajectories for anthropology as a discipline and for decolonising academia across the continent and beyond They offer a variety of perspectives especially regarding collaboration between African and German scholars in the areas of research teaching and institutional development While some are hopeful and take inspiration from earlier experiences of disciplinary and methodological developments in academic decolonisation and international collaborations others remain critical and call for more radical attempts at decolonisation

**Metaverse in Education: Opportunities and Challenges** Sajjad Hussain, Kathleen Meehan, Junaid Qadir, 2024-04-30

Sharing Higher Education's Promise beyond the Few in Sub-Saharan Africa Peter Darvas, Shang Gao, Yijun Shen, Bilal Bawany, 2017-11-15 Despite a spectacular expansion of the higher education sector in Sub Saharan Africa the supply of tertiary education has generally failed to keep pace with demand and the region continues to lag all other regions in terms of access to tertiary education This is in part a consequence of deeply entrenched patterns of inequitable access to higher

education and the perpetuation of what researchers refer to as elite systems To date access to tertiary education in Sub Saharan Africa has unduly benefitted students drawn from the region s wealthiest households and overall enrollment remains disproportionately male and metropolitan These factors stifle the catalytic potential of higher education corroding its potential for driving economic growth and sustaining poverty reduction Instead patterns of access to tertiary education have generally reinforced and reproduced social inequality instead of eroding its pernicious social and economic effects This report aims to inform an improved understanding of equity in tertiary enrollment in Sub Saharan African countries and to examine the extent to which inequity functions as a bottleneck inhibiting the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness In our survey of the evidence we also aim to identify which policies most effectively address the challenge of promoting equity of access in SSA tertiary education systems In order to achieve these objectives the report collects generates and analyzes empirical evidence on patterns of equity examines the underlying causes of inequity and evaluates government policies for addressing inequity

**Assessment of Media Development in Uganda** Nassanga, Goretti Linda,Tayeebwa, William,2018-10-29 **You Can't Make "Fish Climb Trees"** Lawrence Muganga,2018-08-02 In our rapidly changing global environment where learning methods styles and access vary dramatically it is increasingly necessary to stimulate conversation around drastically revolutionizing education In You Can t Make a Fish Climb Trees Overcoming Educational Malpractice through Authentic Learning author and scholar Lawrence Muganga advocates for educational transformation and exposes our archaic education systems modeled for nineteenth century Europe which has allowed governments and administrators to structure and deliver education as if it were an assembly line The current model largely discounts students individual differences and natural abilities impacting their ability to transition from the classroom into the workforce While he focuses on the need for more dynamic education models in Sub Saharan Africa Muganga establishes applications for the presence of Authentic Learning where teaching happens in a student centered environment filled with real world applications throughout the global community Drawing from the research of educational experts worldwide he advocates for the kind of revolutionized education model that would see students individuality used to empower them so that they can navigate their future and the workforce successfully

The Ministers And The Ministry of The New Covenant Zacharias

Tanee Fomum, 2015-08-07 A revolutionary cure This book is a revolutionary cure In its preface author Z T Fomum says these are messages taught at a time when the church was registering an increasing number of young ministers Since the ministry depends on the quality of ministers who are available to the Lord it was a question of presenting to the young ministers in the light of the Scriptures ways and means for the foundation of a glorious ministry by equally glorious ministers radically separated from self and sin and totally surrendered or given to the Lord This is the purpose for which this book is published It is an outline of the fundamental principles for ministry in perfect holiness and from a position of renunciation a revolutionary cure
