Daniel Ness, Chia-Ling Lin

Malawi School Certificate Of Education 2015 Agriculture Paper :

Climate Change and the Role of Education Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context. It is widely believed that education can play a key role in finding global solutions to many problems related to climate change. Indeed, education as a process not only helps young people to better understand and address the impact of global warming but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment. But despite the central importance of education in relation to climate change, there is a paucity of publications on this theme. Against this background, the book focuses on the educational aspects of climate change and showcases examples of research projects and other initiatives aimed at educating various audiences. It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate. Presenting a wide range of valuable lessons learned which can be adapted and replicated elsewhere, the book appeals to educators and practitioners alike.

International Education Daniel Ness, Chia-Ling Lin, 2015-03-17 This encyclopedia is the most current and exhaustive reference available on international education. It provides thorough up-to-date coverage of key topics, concepts, and issues as well as in-depth studies of approximately 180 national educational systems throughout the world. Articles examine education broadly and at all levels from primary grades through higher education, formal to informal education, country studies to global organizations.

Science Education in Context Richard K. Coll, Neil Taylor, 2019-02-18 This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English speaking contexts, i.e. outside the UK, USA, Australia, NZ, etc. An important and distinguishing feature of the book is that it draws upon the experiences and research from local experts from an extremely diverse cohort across the world, 26 countries in total. The book addresses topics such as curriculum development, research or evaluation of an implemented curriculum, discussion of pressures driving curriculum reform or implementation of new curricula, e.g. technology or environmental education, the influence of political, cultural, societal, or religious mores on education, governmental or ministerial drives for curriculum reform, economic or other pressures driving curriculum reform, the influence of external assessment regimes on curriculum, and so on.
