CHAPTER 20 (FIN MAN); CHAPTER 5 (MAN) VARIABLE COSTING FOR MANAGEMENT ANALYSIS

DISCUSSION QUESTIONS

1.
 - a. Under absorption costing, both variable and fixed manufacturing costs are included as a part of the cost of the product manufactured.
 - b. Under variable costing, only the variable manufacturing costs are included as a part of the cost of the product manufactured. The fixed manufacturing costs are treated as an expense of the period in which they are incurred.
2. Fixed factory overhead.
3. Included as part of the cost of product manufactured: (b), (d), (g).
4. In the variable costing income statement, the fixed manufacturing costs and the fixed selling and administrative expenses are reported in a special section for fixed costs and are deducted from the contribution margin.
5. All costs are controllable by someone within the business but not necessarily by the same level of management. For a specific level of management, noncontrollable costs are costs for which another level of management is responsible.
6. In the short run, income from operations is maximized if the revenue from the sale of the product exceeds the variable cost of making and selling the product. Under variable costing, these relevant costs are readily available.
7. Product profitability analysis can be used by management to set product prices, to emphasize promotional activity toward more profitable products or away from less
