metaphor studies and metaphor translation research discerning the importance of localising theories from neighbouring disciplines such as metaphor studies for advancing interdisciplinary research in translation studies Sui He applies this approach to popular cosmological discourse analysing examples from articles in Scientific American and their Chinese translations allowing for a nuanced examination of translation strategies adopted by translators at both cognitive and linguistic levels which presents the circulation and transformation of popular cosmological knowledge from English in two Chinese mediated communities This book will be of interest to students and scholars in translation studies metaphor studies and discourse analysis
