Study on Surface Finish for a CNC Milling Process Abhijit Uday Sahasrabudhe,2003 **Efficiency of Manufacturing Processes** Wen Li,2015-06-13 This monograph presents a reliable methodology for characterising the energy and eco efficiency of unit manufacturing processes The Specific Energy Consumption SEC will be identified as the key indicator for the energy efficiency of unit processes An empirical approach will be validated on different machine tools and manufacturing processes to depict the relationship between process parameters and energy consumptions Statistical results and additional validation runs will corroborate the high level of accuracy in predicting the energy consumption In relation to the eco efficiency the value and the associated environmental impacts of manufacturing processes will also be discussed The interrelationship between process parameters process value and the associated environmental impact will be integrated in the evaluation of eco efficiency The book concludes with a further investigation of the results in order to develop strategies for further efficiency improvement The target audience primarily comprises researchers and experts in the field but the book may also be beneficial for graduate students *The Medical Device R&D Handbook* Theodore R. Kucklick,2005-11-21 The Medical Device R D Handbook presents a wealth of information for the hands on design and building of medical devices Detailed information on such diverse topics as catheter building prototyping materials processes regulatory issues and much more are available in this convenient handbook for the first time The Medical Device R D Ha **Green Manufacturing** David A. Dornfeld,2012-12-09 Green Manufacturing Fundamentals and Applications introduces the basic definitions and issues surrounding green manufacturing at the process machine and system including supply chain levels It also shows by way of several examples from different industry sectors the potential for substantial improvement and the paths to achieve the improvement Additionally this book discusses regulatory and government motivations for green manufacturing and outlines the path for making manufacturing more green as well as making production more sustainable This book also Discusses new engineering approaches for manufacturing and provides a path from traditional manufacturing to green manufacturing Addresses regulatory and economic issues surrounding green manufacturing Details new supply chains that need to be in place before going green Includes state of the art case studies in the areas of automotive semiconductor and medical areas as well as in the supply chain and packaging areas **Energy Efficient Manufacturing** John W. Sutherland,David A. Dornfeld,Barbara S. Linke,2018-08-14 Over the last several years manufacturers have expressed increasing interest in reducing their energy consumption and have begun to search for opportunities to reduce their energy usage In this book the authors explore a variety of opportunities to reduce the energy footprint of manufacturing These opportunities cover the entire spatial scale of the manufacturing enterprise from unit process oriented approaches to enterprise level strategies Each chapter examines some aspect of this spatial scale and discusses and describes the opportunities that exist at that level Case studies demonstrate how the opportunity may be acted on with practical guidance
