Head Start Lesson Plan:

Resources in Education, 2001-04 *Creating Vibrant Art Lesson Plans* Kristin Baxter, 2019 Writing lesson plans is often considered busywork but it can be a useful path for discovering what's important about artmaking and teaching. This book shows teachers how to slow down, breathe, and linger over the process of unit and lesson plan writing to uncover how much this process can support them professionally, creatively, and personally. The user-friendly text offers guidance for selecting an art project for the unit and then zooms into the nitty-gritty of specific lesson plans, including how to identify materials for a project and how to construct classroom dialogue to help students develop ideas for their artwork. The text also considers standards, assessments, and extensions to other subject areas. Featuring accessible language, clear definitions, practical examples, and self-reflection prompts, this unique resource will help pre- and inservice teachers create lesson plans that are useful to their specific contexts and methods of teaching. If you happen to be feeling weary, frustrated, or uninspired, this book sparks imagination, fuels hope, and gives you theories to support what you know needs to be done. From the Foreword by P. Bruce Uhrmacher, Christy McConnell Moroye, and Bradley Conrad, educational researchers. Baxter invites us to slow down and consider the lesson plan as a creative catalyst to inspire our own artmaking, as well as a space to examine why and what we teach. Lisa Hochtritt, Maryland Institute College of Art. An inspiring and playful resource that is much more rewarding than typical lesson planning. It will surely spark your imagination with every flip of the page. Hailey Adlard, art educator, Parkland School District, PA. Newly Hired Teachers of Science Julie A. Luft, Shannon L. Dubois, 2015-12-09 Supporting newly hired science teachers has taken on an increased importance in our schools. This book shares the most current information about the status of newly hired science teachers, different ways in which to support newly hired science teachers, and different research approaches that can provide new information about this group of teachers. Chapters in the book are written by those who study the status of beginning science teachers, mentor new teachers, develop induction programs, and research the development of new science teachers. *Newly Hired Teachers of Science* is for administrators who have new science teachers in their schools and districts, professionals who create science teacher induction programs, mentors who work closely with new science teachers, educational researchers interested in studying new science teachers, and even new science teachers. This is a comprehensive discussion about new science teachers that will be a guiding document for years to come.
