

How to Calculate APS Score?

Calculating your APS score might not be as intimidating as it seems. Here is a breakdown of how you can determine your APS score.

- The total number you get in each subject ranges from 0 to 100.
- Each mark on the point score ranges from 1 to 7 (1 being lowest and 7 being highest. For instance, if you have received 45% in English, your marks on the point score will become 3.
- The total APS score is calculated by adding all the points (obtained) in your six compulsory Matric subjects. Please note that Life Orientation is not included in your APS score.

Now that you know how to calculate the APS score, let us understand the point allocation and what each mark signifies on the point scale.

Matric Subject Symbols	Obtained Marks in Matric	APS Score
A Symbol	80 to 100%	7
B Symbol	70 to 79%	6
C Symbol	60 to 69%	5
D Symbol	50 to 59%	4
E Symbol	40 to 49%	3
F Symbol	30 to 39%	2
G Symbol	0 to 29%	1

Now, let us demonstrate the APS score calculation through an example. Callo obtained the following results for his Matric NSC final exams and wants to derive his APS score. Here is how the calculation goes.

HELP: A Dynamic Hospital Information System Gilad J. Kuperman, Reed M. Gardner, T. Allan Pryor, 2013-03-12 This monograph series is intended to provide medical information scientists health care administrators health care providers and computer science professionals with successful examples and experiences of computer applications in health care settings Through the exposition of these computer applications we attempt to show what is effective and efficient and hopefully provide some guidance on the acquisition or design of information systems so that costly mistakes can be avoided The health care industry is currently being pushed and pulled from all directions from the clinical side to increase quality of care from the business side to improve financial stability from the legal and regulatory sides to provide more detailed documentation and in a university environment to provide more data for research and improved opportunities for education Medical information systems sit in the middle of all these demands They are not only asked to provide more better and more timely information but also to interact with and monitor the process of health care itself by providing clinical reminders warnings about adverse drug interactions alerts to questionable treatment alarms for security breaches mail messages workload schedules etc Clearly medical information systems are functionally very rich and demand quick response time and a high level of security They can be classified as very complex systems and from a developer's perspective as risky systems
