Integrated Management of Technical Documentation

Jirka Hoppe,2012-12-06 Writing documentation is an integral part of any technical product development A significant amount of time is spent describing the product functionality giving insights into technical details providing maintenance instructions specifying marketing information writing user manuals etc As the creation of such documentation is generally a source of higher production costs many large companies are realising the need to increase the efficiency of documentation handling Simple documents consisting of only a few pages can be developed on simple systems Basic components of such systems are an editor handling text and graphics file storage and a printer Such configurations however are not sufficient to handle professional documentation as produced by larger companies Detailed studies of technical documentation requirements have revealed that in particular the following functionality is not usually provided by such simple documentation systems

Technical documentation is often very large documents having hundreds or even thousands of pages are not exceptional Due to size and complexity technical documentation is developed most often by a team of authors A system for technical documentation has to provide functionality supporting the organisation of a group of authors Technical documentation usually consists of many different documents combined into one large documentation for a particular product The optimum organisation of the storage and retrieval of documents is crucial for the performance and acceptability of the system The functionality offered by normal file systems is not adequate to organise complex systems Intermediate (direct and General Support) Maintenance Manual ,1992 Writing and Designing Manuals and Warnings, Fifth Edition Patricia A. Robinson,2019-11-11 Technology is changing the way we do business the way we communicate with each other and the way we learn This new edition is intended to help technical writers graphic artists engineers and others who are charged with producing product documentation in the rapidly changing technological world While preserving the basic guidelines for developing manuals and warnings presented in the previous edition this new edition offers new material as well including a much expanded section on hazard analysis Features Provides more explicit guidance on conducting a hazard analysis including methods and documentation Offers in depth discussion of digital platforms including video animations and even virtual reality to provide users with operating instructions and safety information Incorporates current research into effective cross cultural communication essential in today s global economy Explains new US and international standards for warning labels and product instructions Presents expanded material on user analysis including addressing generational differences in experience and preferred learning styles Writing and Designing Manuals and Warnings Fifth Edition explores how emerging technologies are changing the world of product documentation from videos to virtual reality and all points in between
