Auer,David Guralnick,Istvan Simonics,2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27 29 September 2017 The authors are currently witnessing a significant transformation in the development of education The impact of globalisation on all areas of human life the exponential acceleration of technological developments and global markets and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education To face these current real world challenges higher education has to find innovative ways to quickly respond to them Since its inception in 1998 this conference has been devoted to new approaches in learning with a focus on collaborative learning Today the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context **Gender and Practice** Vasilikie (Vicky) Demos,Marcia Texler Segal,Kristy E. defined in relation to two terms access and quality This book is focused on the connection between them Through a mixed methods case study it provides detailed contextualized analysis of Ugandan primary education As one of the first countries in Sub Saharan Africa to enact dramatic and far reaching primary education policy Uganda serves as a compelling case study With both quantitative and qualitative data from over 400 Ugandan schools and communities the book analyzes grade repetition private primary schools and school fees viewing each issue as an illustration of the connection between access to education and education quality This analysis finds evidence of a positive association challenging a key assumption that there is a trade off or disconnect between efforts to improve access to education and efforts to improve education quality Embracing the complexity of education systems and focusing on dynamics where improvements in access and quality can be mutually reinforcing can be a new approach for improving basic education in different contexts around the world *Annual Budget Monitoring Report Uganda,2015*
