

OUR 10-K RESULTS

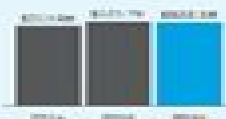

"GE had a challenging year in 2017. While most of our businesses showed solid—and, in the cases of Aviation and Healthcare, world-class—performance, our cash flow did not meet our expectations, we took significant charges on GE Capital and we made difficult decisions regarding the divisional exit members of our teams. As we move forward, we are focusing on running our businesses better. This really means concentrating on fewer things to deliver customer outcomes, strengthening our business units, running the Company for cash and driving a new culture for the future. We are also continuing to review every option to ensure the best results for our customers, employees and owners."

Ge Annual Report 2006:

New Class Society Robert Perrucci, Earl Wysong, 2008 This book explores how class based resources and interests embedded in large organizations are linked to powerful structures and processes which in turn are rapidly polarizing the U S into a highly unequal double diamond class structure The authors show how and why American class membership in the 21st century is based on an organizationally based distribution of critical resources including income investment capital credentialed skills verified by elite schools and social connections to organizational leaders **Research, Quality,**

Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the cruel aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powerhouses like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage Transnational Management Christopher A. Bartlett, Paul W. Beamish, 2018-03

Globalization and American Popular Culture Lane Crothers, 2007 This concise and insightful book examines the way that American movies music and television—as goods marketed and consumed around the world—are key elements of contemporary globalization Lane Crothers offers a nuanced exploration of these influential cultural products and their contradictory impact in some cases promoting a desire for integration into the broader world community in others generating disgust and outright rejection Concluding with a projection of the future influence of American popular media this book makes a powerful argument for its central role in shaping global politics and economic development **Cross-Business**

Gupta,Vijay Govindarajan,Haiyan Wang,2015-01-12 Anil K Gupta Vijay Govindarajan and Haiyan Wang are among the most distinguished experts in the field of globalization In The Quest for Global Dominance they present the lessons from their twenty year study of over two hundred corporations They argue that in order for a company to create and maintain its position as a globally dominant player executives must ensure that their company leads its industry in the following four essential tasks Identifying market opportunities worldwide and pursuing them by establishing the necessary presence in all key markets Converting global presence into global competitive advantage by identifying and developing the opportunities for value creation that global presence offers Cultivating a global mindset by viewing cultural and geographic diversity as an opportunity not just a challenge Leveraging the rise of emerging markets especially China and India to transform the company s growth prospects global cost structure and pace of innovation
