Hrc Organizational And Functional Manual 10 5:

The Intermediary in the Criminal Justice System John Taggart, 2025-07-25 This book undertakes a sociolegal examination of the intermediary role within the criminal justice system The intermediary special measure is one of the most innovative and controversial developments in the history of English criminal procedure But what does the role actually involve That is the central question explored in this book Despite increased academic attention into this new criminal justice actor the content of the intermediary role remains unclear Based centrally on empirical data gathered in England and Wales and Northern Ireland but also drawing upon comparative material from other jurisdictions the book examines how those executing the intermediary role understand its work and how other criminal justice actors perceive it The book then uses this as the basis for generating a theory of the intermediary role and its scope and content It also considers the future of the role and its integration into the criminal justice system This book will appeal to those researching and studying in the areas of sociolegal studies criminal law and criminology as well as lawyers judges intermediaries and policy makers working in relevant areas

The Right(s) to Water Pierre Thielbörger, 2013-09-30 Politicians and diplomats have for many years proclaimed a human right to water as a solution to the global water crisis most recently in the 2010 UN General Assembly Resolution The human right to water and sanitation To what extent however can a right to water legally and philosophically exist and what difference to international law and politics can it make This question lies at the heart of this book The book's answer is to argue that a right to water exists under international law but in a more differentiated and multi-level manner than previously recognised Rather than existing as a singular and comprehensive right the right to water should be understood as a composite right of different layers both deriving from separate rights to health life and an adequate standard of living and supported by an array of regional and national rights The author also examines the right at a conceptual level After disproving some of the theoretical objections to the category of socio-economic rights generally and the concept of a right to water more specifically the manuscript develops an innovative approach towards the interplay of

different rights to water among different legal orders The book argues for an approach to human rights including the right to water as international minimum standards using the right to water as a model case to demonstrate how multilevel human rights protection can function effectively The book also addresses a crucial last question how does one make an international right to water meaningful in practice The manuscript identifies three crucial criteria in order to strengthen such a composite derived right in practice independent monitoring enforcement towards the private sector and international realization The author examines to what extent these criteria are currently adhered to and suggests practical ways of how they could be better met in the future *The College Blue Book* Huber William Hurt, Harriett-Jeanne Hurt, 1962 **Child Development**
