Archaeology And Geographic Information Systems Gary R Lock,Zoran Stancic,2022-03-26 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource Complementing the volume *Interpreting Space* Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland **Loma, a Citizen of Venus** William Windsor,1897

Metropolitan Oakland International Airport (MOIA), Airport Development Program (ADP), Port of Oakland, Alameda County ,1996 [Unmasking the State](#) Mike McGovern,2024-05-31 When the Republic of Guinea gained independence in 1958 one of the first policies of the new state was a village to village eradication of masks and other ritual objects it deemed fetishes The Demystification Program as it was called was so urgent it even preceded the building of a national road system In *Unmasking the State* Mike McGovern attempts to understand why this program was so important to the emerging state and examines the complex role it had in creating a unified national identity In doing so he

tells a dramatic story of cat and mouse where minority groups cling desperately to their important and outlawed customs. Primarily focused on the communities in the country's southeastern rainforest region, people known as Forestiers, the Demystification Program operated via a paradox. At the same time it banned rituals from Forestiers' day-to-day lives, it appropriated them into a state-sponsored program of folklorization. McGovern points to an important purpose for this by objectifying this polytheistic group's rituals: the state created a viable counterexample against which the Muslim majority could define proper modernity. Describing the intertwined relationship between national and local identity, making McGovern showcase the coercive power and the unintended consequences involved when states attempt to engineer culture.

There are also special articles on the archaeology and ethnohistory of selected regions within northern Mesoamerica. The Handbook of Middle American Indians was assembled and edited at the Middle American Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology. **University of California publications in geological sciences** California.
